

# Chapitre 12 : Quelle action publique pour l'environnement ?

- Savoir identifier les différents acteurs (pouvoirs publics, ONG, entreprises, experts, partis, mouvements citoyens) qui participent à la construction des questions environnementales comme problème public et à leur mise à l'agenda politique ; comprendre que ces acteurs entretiennent des relations de coopération et de conflit.
- Comprendre que l'action publique pour l'environnement articule différentes échelles (locale, nationale, européenne, mondiale).
- En prenant l'exemple du changement climatique :
  - connaître les principaux instruments dont disposent les pouvoirs publics pour faire face aux externalités négatives sur l'environnement : réglementation, marchés de quotas d'émission, taxation, subvention à l'innovation verte ; comprendre que ces différents instruments présentent des avantages et des limites, et que leur mise en œuvre peut se heurter à des dysfonctionnements de l'action publique ;
  - comprendre qu'en présence de bien commun les négociations et accords internationaux liés à la préservation de l'environnement sont contraints par des stratégies de passager clandestin et les inégalités de développement entre pays.

## Introduction : Pourquoi agir pour l'environnement ?

Croissance économique = 6<sup>ème</sup> extinction de masse + changement climatique + catastrophes industrielles.

**Solution : le développement durable**
