

ACRYLITE® Optical mar resistant Extruded Sheet

Product

ACRYLITE® Optical mar resistant sheet is a continuously manufactured acrylic sheet that has excellent abrasion and chemical resistant properties with outstanding optical quality. It is available with coating on one side (MR1) or two sides (MR2). While two-side coated sheet provides maximum protection, one side coated sheet offers economic advantages for applications where only one side of the sheet is exposed. In addition, the uncoated side is ideal for silk screening.

Applications

ACRYLITE® Optical mar resistant sheet is ideal for a wide variety of applications including:

- Glazing
- P-O-P Displays / Store Fixtures
- Menu Boards
- Electronic Displays / Museum Displays
- Signs & Directories
- Furniture & Interiors
- Framing
- Sports Arena Glazing
- Architectural Glazing
- Security Glazing
- Automotive Interiors
- Instrument Cluster Panels

Properties

ACRYLITE® Optical mar resistant sheet provides the following outstanding properties:

- Optical clarity
- Abrasion resistance
- Chemical resistance
- Ease of fabrication
- Light weight – half the weight of glass
- Strength – many times the impact strength of glass

ACRYLITE® Optical mar resistant sheet resists marring and scratching from everyday public contact, daily cleanings, airborne dirt and dust that are found in many applications. This property significantly extends the service life of the product. Although the coating provides an extremely hard surface to resist these abuses, it is not resistant to intentional gouging with sharp-tipped objects, such as knives or screwdrivers.

Because ACRYLITE® Optical mar resistant sheet offers protection from chemical attack, many household glass cleaners can be used on the coated surfaces. Recommended cleaning agents and chemical resistance information can be found on page 4.
