

ACT Writing Prompt Edit

Public Health and individual freedom are two desires that conflict a lot, and humans have many different perspectives on them. Perspective one states our public health is more important than freedom, and freedom may need to be restricted sometimes. Perspective two includes a strong belief that freedom is more important than public health, and is what makes our society so incredible over others. Perspective three states the right to avoid health risks is a freedom, but also individual freedom can be dangerous; which is damaging to freedom and health.

My personal perspective on this current issue is; health over individual freedom. I believe health is our future, and without it we won't have lasting generations. Of course many people do not care for their health, but it's not fair to endanger the ones around that do. Freedom is important, and does make our country significant, but it has to be restricted when it comes to public health. So, I believe health is wealth, health is our future and health is more important than public freedom.

My perspective is in full agreement with perspective one. Perspective one, and myself believe health is important for the public, and freedom must be restricted when it interferes with our health. Perspective two, and myself have opposing thoughts, I believe in health over freedom, and perspective two believes in freedom over health. Perspective three and I have some similar thoughts, but are still different. Both myself and perspective three know the right to avoid health risks is a freedom. Although, I believe if/when it affects the rest of the public, it is not ok. I do agree with perspective three when it explained individual Freedom can be endangering, which is damaging to both freedom and Health. So I agree with perspective one, disagree perspective two, and agree to disagree with perspective three.

In conclusion, my personal opinion is that public health is more important than individual freedom. My opinion was in full agreement with perspective one, and partially with perspective three. However, perspective two and myself have opposing thoughts. I believe perspective one is superior to the others, and that in the end some freedoms must be restricted when it comes to public health.
