**Dictionary Use and Dictionary Teaching** Annette Klosa-Kückelhaus, Martina Nied Curcio, 2024-10-07 Foreign language learners often use electronic dictionaries or other information from the Internet to solve language problems However they seem to have great difficulty using dictionaries and online resources appropriately profitably and successfully Their teachers also seem unfamiliar with the current dictionary landscape and sometimes insist on using a single monolingual print dictionary in class As a result dictionaries are often banned from the classroom altogether However in today s digital global and multilingual world appropriate competence in the use of dictionaries is an essential communicative strategy Dictionary didactics should thus be integrated into foreign language teaching Against this background the contributions in this volume discuss how dictionary use can be promoted and integrated into the classroom They also consider how modern lexical resources and dictionaries should be designed to support learners Last but not least they present ideas for educational policies that could promote the use of dictionaries and lexicographic online resources This volume offers important insights to language teachers authors of language teaching materials practical lexicographers and other applied linguists

Tests that Second Language Teachers Make and Use Greta Gorsuch, 2019-10-24 Classroom tests are an everyday feature of second and foreign language classrooms worldwide Teachers spend a lot of time and energy making and using tests and learners spend a lot of time and energy taking them Nonetheless such assessments are under studied as they are considered routine This volume illuminates this little researched area Featuring fifteen classroom language tests made and used by Chinese English French German Italian Japanese Russian and Spanish teachers the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers processes of making and using their tests Rather than view teachers tests as poor shadows of what professional test writers do this work identifies the reasoning behind teachers tests In addition focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary This book is an accessible applied resource for second and foreign language teachers language program administrators working with teachers students in teacher preparation and enrichment programs and scholars in language teaching learning and testing
