

TABLE 1

KEY CONCEPTS OF RESEARCH, EVIDENCE-BASED PRACTICE, AND QUALITY IMPROVEMENT, INCLUDING APPLICATION EXAMPLES

Methods of inquiry concepts	Application examples
<p>Research</p> <p>Provides a scientific basis for the practice of the profession</p> <p>Intended to generate new knowledge</p> <p>Systematic process to answer clinical questions with identified knowledge gaps in the literature</p> <p>Institutional review board oversight needed</p>	<p>Literature supports the use of peer-to-peer feedback in providing opportunities for personal and professional growth and promoting a safety culture. However, gaps were identified in the practice and process of performing peer-to-peer evaluations among clinical nurses within a given organization. Thus, a descriptive exploratory study was conducted to understand the in-patient nurses' perceptions of peer-to-peer feedback and the facilitators and barriers to performing peer-to-peer evaluations.</p>
<p>Evidence-based practice</p> <p>Problem-solving approach to clinical decision-making in health care</p> <p>Integrates the best and latest scientific evidence</p> <p>Uses critical thinking in the judicious application of evidence in current practice</p> <p>Incorporates the patient's preferences in its application</p> <p>May be used as a foundation/platform for establishing a practice standard of care</p>	<p>An intensive care unit nurse returned from a critical care conference that showcased the use of the proning position for awake patients with COVID-19. She reviewed the literature, gathered evidence to support the practice, collaborated with key interprofessional stakeholders, and implemented the practice of awake proning for patients with COVID-19.</p>
<p>Quality improvement</p> <p>Systematic and continuous actions</p> <p>Goal is measurable improvements in existing health care services</p> <p>Targeted population health</p> <p>May be used when a drift is observed in an established standard of practice</p>	<p>Because of the influx of patients with COVID-19 needing central line insertion, one of the nurses deemed competent in placing peripherally inserted central catheters developed a workflow modification that cut the time of peripherally inserted central catheter insertion from 2 hours to 45 minutes. Using the Plan-Do-Study-Act model as a framework, the team established targets, implemented the change, and on an ongoing basis, collected and evaluated the data based on the new workflow.</p>

Note: COVID-19 = coronavirus disease 2019.

84report For Evidence

Thomas Whitney Waterman

84report For Evidence:
