R. Kent Crookston, 2012-07-30 **Working with Problem Faculty** When asked to name their number one concern and problem, department leaders overwhelmingly said that it was dealing with difficult people. Now R. Kent Crookston draws on the wisdom of seasoned department chairs, the academic literature, and his own experience as a department head and dean to shed new light on this perennial problem. **Working with Problem Faculty** outlines a practical six-step process that aims at improving an entire department and charts a clear course for dealing with problem faculty by: Clarifying values and expectations; Following policy; Building trust with colleagues; Evaluating yourself and your perceptions; Listening; Taking appropriate action. By following these six steps, department chairs are able to challenge problem faculty with consideration, confidence, and effectiveness. Anyone seeking practical help in dealing with difficult people will appreciate this book. Using relevant examples, Crookston describes a six-step process for managing people who might appear to be unmanageable. Mary Lou Higgerson, vice president for academic affairs emerita, Baldwin Wallace University, Crookston has done his homework. After careful research and decades of personal experience, Dr. Crookston shares a practical, insightful, and crucial handbook for addressing the most formidable challenge all leaders face. And best of all, he doesn't just advise on how to act when things go wrong; he gives proactive guidance to ensure that things go right. Joseph Grenny, New York Times bestselling coauthor of *Change Anything* and *Crucial Conversations: Tools for Talking When Stakes are High*. **The Challenger Launch Decision**

Diane Vaughan, 2016-01-04 An in-depth account of the events and personal actions which led to a great tragedy in the history of America's space program. James D. Smith, former Solid Rocket Booster Chief, NASA Marshall Space Flight Center. When the Space Shuttle Challenger exploded on January 28, 1986, millions of Americans became bound together in a single historic moment. Many still vividly remember exactly where they were and what they were doing when they heard about the tragedy. Diane Vaughan recreates the steps leading up to that fateful decision, contradicting conventional interpretations to prove that what occurred at NASA was not skulduggery or misconduct but a disastrous mistake. Why did NASA managers, who not only had all the information prior to the launch but also were warned against it, decide to proceed? In retelling how the decision unfolded through the eyes of the managers and the engineers, Vaughan uncovers an incremental descent into poor judgment supported by a culture of high-risk technology. She reveals how and why NASA insiders, when repeatedly faced with evidence that something was wrong, normalized the deviance so that it became acceptable to them. In a new preface, Vaughan reveals the ramifications for this book and for her when a similar decision-making process brought down NASA's Space Shuttle.

Columbia in 2003 Vaughn finds the traditional explanation of the Challenger accident to be profoundly unsatisfactory One by one she unravels the conclusions of the Rogers Commission The New York Times A landmark study Atlantic Vaughn gives us a rare view into the working level realities of NASA The cumulative force of her argument and evidence is compelling Scientific American *Catalog of Copyright Entries.
