a systematic and comprehensive introduction to the neutronics of advanced nuclear systems covering all key aspects from
the fundamental theories and methodologies to a wide range of advanced nuclear system designs and experiments It is the
first ever book focusing on the neutronics of advanced nuclear systems in the world Compared with traditional nuclear
systems advanced nuclear systems are characterized by more complex geometry and nuclear physics and pose new
challenges in terms of neutronics Based on the achievements and experiences of the author and his team over the past few
decades the book focuses on the neutronics characteristics of advanced nuclear systems and introduces novel neutron
transport methodologies for complex systems high fidelity calculation software for nuclear design and safety evaluation and
high intensity neutron source and technologies for neutronics experiments At the same time it describes the development of
various neutronics designs for advanced nuclear systems including neutronics design for ITER CLEAR and FDS series
reactors The book not only summarizes the progress and achievements of the author s research work but also highlights the
latest advances and investigates the forefront of the field and the road ahead **NBS Special Publication** ,1968
