Sotho Question Papers:

The Oxford Guide to the Bantu Languages Lutz Marten, Ellen Hurst-Harosh, Nancy C. Kula, Jochen Zeller, 2025-08-19

This volume brings together leading scholars from Africa Europe the Americas and beyond to provide a detailed account of the languages of the Bantu family which cover an area from Cameroon and Kenya in the north to South Africa in the south. The Bantu family is part of the Niger Congo phylum and one of the world's biggest language groups comprising around 500 languages. The family includes major languages with large numbers of speakers such as Zulu, Kinyarwanda and Swahili, the most widely spoken and taught African language as well as many community languages and several endangered languages. Bantu languages feature prominently in the complex and multilingual language ecologies that are characteristic of the linguistic situation in much of Africa and they provide rich evidence for the study of theoretical and comparative linguistics, language contact and language change. They play an important role in education, commerce, culture and artistic expression in the media and public discourse in governance and social justice and are central to the future of the continent and the well-being of its communities. The first part of *The Oxford Guide to the Bantu Languages* provides background and context with chapters exploring the history of research in the field, language and prehistory in Bantu-speaking Africa and typology and variation. Chapters in the second part offer broad comparative overviews of Bantu phonology, morphology, syntax, semantics and pragmatics, socio and applied linguistics. Parts III-VII cover more specific topics in Bantu linguistics across a variety of subfields ranging from structural issues such as the augment and melodic tone to historical and sociolinguistic topics such as Bantu languages in the diaspora and language policy and standardization. The chapters in the final part offer individual structural overviews of a range of languages from across the Bantu-speaking area. The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly.

Resources in Education, 1992 **Globalisation and African Languages** Katrin Bromber, Birgit Smieja, 2011-07-20

Globalisation and African Languages links African language studies to the concept of globalisation which increasingly undergoes critical review. Hence African linguists of various provenience can make valuable contributions to this debate. In cultural matters which by definition include language there is often a sense that globalisation leads to a major trend of homogenisation which results in a reduction of diversity on the one hand and on the other in new themes being incorporated into global cultural patterns. However, often conflicting and overlapping particularistic interests exist which have a constructive as well as destructive potential. This aspect leads directly to the first of three sections of this volume: LANGUAGE USE AND ATTITUDES which addresses some of the burning issues in sociolinguistic research. Since this research area is tightly linked to the educational domain these important issues are addressed in articles that comprise the second section of this volume: LANGUAGE POLICY AND EDUCATION. The third section of the volume presents articles dealing with

LANGUAGE DESCRIPTION AND CLASSIFICATION demonstrating which parts of different language systems are affected through contact under historical and modern conditions The contributions of all the well known scholars in this volume show that globalisation is a two way street and to ensure that all sides benefit in a reciprocal manner means the impacts have to be monitored globally regionally nationally and locally By disseminating and emphasising these linguistic findings as part of the global cultural heritage African language studies may offer urgently needed new perspectives towards a rapidly changing world *Linguistische Berichte* ,2006 *Ikpana Interrogatives* Jason Kandybowicz,Bertille Baron,Philip T. Duncan,Hironori Katsuda,2023 This book documents the interrogative system of Ikpana an endangered indigenous Ghana Togo Mountain language of eastern Ghana It encompasses both syntactic and phonological aspects of question formation and draws on original fieldwork and a combination of formal theoretical and experimental methodologies Afrikanistische Arbeitspapiere ,2001 **The Germanic Mosaic** Carol A. Blackshire-Belay,1993-12-07 This is a comprehensive and up to date critical examination of cultural diversity in Germanic speaking societies It goes beyond ethnic religious and gender stereotypes to show minority groups as active participants in German history rather than as passive victims This collection of critical and theoretical essays seeks to interpret the current philosophical aesthetic and literary thinking about diversity in literature and language The book is divided into four parts literary analyses of works produced by members of minority populations linguistic discussions and case studies of minority groups structures and strategies of discourse and prejudice and studies of remedies for problems of racism and discrimination Some of the most significant writers and thinkers in the field have contributed making this volume of critical concern to scholars and students of German modern languages and comparative studies *Multilingual Universities in South Africa* Liesel Hibbert,Christa van der Walt,2014-04-03 Focusing on the use of African languages in higher education this book showcases South African higher education practitioners attempts to promote a multilingual ethos in their classes It is a first time overview of multilingual teaching and learning strategies that have been tried and tested in a number of higher education institutions in South Africa Despite language in education policies that extol the virtues of multilingualism practice remains oriented towards English only learning and teaching In the multilingual contexts of local campuses this book shows how students and lecturers attempt to understand their multiple identities and use the available languages to create multilingual learning environments **Word Classes** Raffaele Simone,Francesca Masini,2014-09-15 The universal and typological status of the notion of word class closely related to part of speech systems morphology syntax and the lexicon syntax interface continues to be of major linguistic theoretical interest The papers included in this volume offer a fresh look at the variety of current theoretical and descriptive approaches to word class issues and present original analyses and new data from a number of languages The primary focus is on methods including computational ones and criteria for identifying and representing major word classes and subclasses in specific languages with considerable attention also directed towards the characterization of the nature and role of minor or neglected

word classes including trans categorization processes The range of topics and perspectives covered makes this volume of considerable interest to both theoretical linguists and typologists
