**Diagrams to Illustrate the Lectures on Crystallography** Thomas Egleston, 1875      *Ferroelectric-Gate Field Effect Transistor Memories* Byung-Eun Park, Hiroshi Ishiwara, Masanori Okuyama, Shigeki Sakai, Sung-Min Yoon, 2020-03-23 This book provides comprehensive coverage of the materials characteristics process technologies and device operations for memory field effect transistors employing inorganic or organic ferroelectric thin films This transistor type ferroelectric memory has interesting fundamental device physics and potentially large industrial impact Among various applications of ferroelectric thin films the development of nonvolatile ferroelectric random access memory FeRAM has been most actively progressed since the late 1980s and reached modest mass production for specific application since 1995 There are two types of memory cells in ferroelectric nonvolatile memories One is the capacitor type FeRAM and the other is the field effect transistor FET type FeRAM Although the FET type FeRAM claims the ultimate scalability and nondestructive readout characteristics the capacitor type FeRAMs have been the main interest for the major semiconductor memory companies because the ferroelectric FET has fatal handicaps of cross talk for random accessibility and short retention time This book aims to provide the readers with development history technical issues fabrication methodologies and promising applications of FET type ferroelectric memory devices presenting a comprehensive review of past present and future technologies The topics discussed will lead to further advances in large area electronics implemented on glass plastic or paper substrates as well as in conventional Si electronics The book is composed of chapters written by leading researchers in ferroelectric materials and related device technologies including oxide and organic ferroelectric thin films      Nuclear Science Abstracts, 1975      **Human Barrier Design and Lifecycle** Tom Shephard, 2024-05-07 A common source of failure in a human dependent barrier or safety critical task is a designed in mismatch error The mismatch is a cognitive demand that exceeds the human capability to reliably and promptly respond to that demand given the plausible situations at that moment Demand situations often include incomplete information increased time pressures and challenging environments This book presents innovative solutions to reveal prevent and mitigate these and many other cognitive type errors in barriers and safety critical tasks The comprehensive model and methodologies also provide insight into where and to what extent these barriers and task types may be significantly underspecified and the potential consequences This title presents a new and comprehensive prototype design and lifecycle model specific to human dependent barriers and safety critical tasks Designed to supplement current practice the model is fully underpinned by cognitive ergonomics and cognitive science The book also presents a compelling case for why a new global consensus standard specific to human dependent barriers is needed Taking a novel approach it presents its suggested basis framing and content Both solutions seek to redress deficiencies in global regulations standards and practice The model is guided by industry recommendations and best practice guidance and solutions from globally recognized experts Its processes are fully explained and supported by examples analysis and well researched

background materials Real life case studies from offshore oil and gas chemical manufacturing transmission pipelines and product storage provide further insight into how overt and latent design errors contributed to barrier degradation and failure and the consequence of those errors An essential and fascinating read for professionals Human Barrier Design and Lifecycle A Cognitive Ergonomics Approach and Path Forward will appeal to those in the fields of human factors process and technical safety functional safety display and safety system design risk management facility engineering and facility operations and maintenance Chapters 1 and 8 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY-NC-ND 4.0 International license
