A Dog's Work

Did you know that some dogs have jobs? A service dog is trained to help a human do many things. Service dogs can help their owners with tasks such as hearing, seeing, and picking things up.

Seeing eye dogs help a person who is blind to walk in a line, cross the street, and avoid obstacles.

Service dogs go to work and not to play. They are usually trained to do a specific job and are not allowed to play with children.

Music in Your Pocket

The Walkman hit the scene as a new, completely portable way to listen to music. It was a small, boxy device that could hold a few hours of music on a cassette tape. People loved it because it was so convenient. They could take their music anywhere. CDs came along later, and they were even more convenient. They were smaller and could hold more music. Now, with digital music, people can carry thousands of songs on a tiny device. Music is everywhere now, and it's so easy to listen to.

Worth the Wait

"You will be amazed when you see it," the park ranger said as we sat on the hard wooden benches of the boardwalk. My family was visiting Yellowstone national park. "Yellowstone has many geysers that shoot very hot water and steam into the air, but Old Faithful is the most famous because it goes off every hour or so. It was named Old Faithful because it goes off so regularly."

The Relationship Between Reading Fluency, Writing Fluency, and Reading Comprehension in Suburban Third-grade Students Mary Leonard Palmer, 2021 The topic of reading fluency is of great importance in education today Research has shown a significant positive relationship between reading fluency and reading comprehension However little is known about writing fluency and its connection with reading comprehension The purpose of this study was to examine the relationships between reading fluency writing fluency and reading comprehension First using the principles of assessing reading fluency I designed a writing assessment and measured the writing fluency of 54 3rd graders I examined the writing assessments as they related to the students reading fluency and reading comprehension scores Secondly I performed a quasi experimental scientific study with 3rd grade students The control group n 36 were taught the board adopted language arts curriculum while the experimental group n 18 had systematic direct instruction in reading and writing fluency in addition to the regular language arts curriculum The research questions were What is the relationship between students reading comprehension and reading fluency among a group of

third graders What is the relationship between their reading comprehension and writing fluency What is the relationship between their reading fluency and writing fluency Will the experimental group of students with direct instruction in reading and writing fluency outperform the control group in reading comprehension What other factors are involved in increasing reading comprehension Pearson s correlation statistic paired t tests independent samples t tests and multiple linear regression analysis were used to analyze the data All statistical analyses were performed using PASW formerly SPSS for Windows Consistent with reading research the results showed there was a strongly positive correlation between reading comprehension and reading fluency This study also found a correlation between reading comprehension and writing as well as a correlation between reading comprehension and writing fluency However the link between reading comprehension and writing fluency was not found in pretest measurement or the posttest pretest measurement The ANOVA results showed that reading and writing fluency explained a statistically significant 50% of the total variance in reading comprehension scores This study also showed a strong positive correlation between reading fluency and writing fluency in the posttest measurement In the quasi experimental study the experimental group did not outperform the experimental group both groups made significant progress The major implication of this study is that writing could help increase reading comprehension which results in another tool for teachers to use in teaching reading comprehension This could result in an additional emphasis in teaching writing skills in the classroom

Olson,2011 The purpose of this study was to determine if reading fluency practice passages should be at grade level or at their independent reading level The researcher conducted research in her third grade classroom The class was divided into two groups of mixed abilities one group read fluency passages at grade level and the other group read fluency passages at their independent reading level for a three week period After the three weeks students were interviewed about their reading experience and how they feel about their reading along with information gathered from their fluency and comprehension passages to see whether the students show an improvement in their reading fluency and comprehension ability I found that the majority of the students who practiced reading passages at their individual reading level made a gain in the number of words read per minute compared to those who practiced reading a third grade reading passage *21st Century Education:*
