Road and Track ,2005 StarBriefs 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions

The Ford GT SAE International, 2004-03-08 In the 1960 s very little science and engineering had been applied to the art of motor racing As a result there was no general agreement about the best technical approach to generating speed on a road racing track Each car maker viewed the problem through the lenses of their own history and capabilities The cars on the starting grid demonstrated how varied these histories were When Ford first assaulted Le Mans in 1964 the company followed a similarly casual approach by initially purchasing a race car design from the English firm Lola This car s numerous shortcomings soon led Ford to apply its considerable engineering and developmental resources to the project and the result was the one two three finish in 1966 First place finishes followed in 1967 1968 and 1969 It is the fabulous victories by Ford in the 1960 s that inspired the new 2005 Ford GT Based on a concept car the new production car embodies the characteristic proportions and styling elements of the original GT Under its skin however it has little in common with the original other than its mid engine layout The 2005 Ford GT must function as a street car with a climate control system moderate interior noise levels a reasonable ride and the ability to operate in extremes of hot and cold The seven original SAE papers from the 1960 s contained in this book provide a wonderful insight into the development of the original Ford GT during what many consider to be the technically most interesting period of sports car racing The 11 SAE papers about the new GT included in this volume explain how Ford engineers managed to meet numerous modern day requirements while staying true to the spirit of the original
