Advances In Tourism Economics New Developments:

Advances in Tourism Economics Álvaro Matias, Peter Nijkamp, Manuela Sarmiento, 2009-09-16 *Advances in Tourism Economics* follows his predecessor *Advances in Modern Tourism Research 2007* in providing a thorough assessment of state of the art economic research in this rapidly developing field. The authors start by analyzing the recent upsurge of model based economic research in the field which builds on powerful tools in quantitative economics such as discrete choice models, social accounting matrices, data envelopment analyses, impact assessment models or partial computable equilibrium models including environmental externalities. The volume originates from this novel research spirit in the area and aims to offer an attractive collection of operational research tools and approaches. It forms an appealing record of modern tourism economics and positions the field within the strong tradition of quantitative economic research with due attention for both the demand and supply side of the tourism sector including technological and logistic advances. Tourism Economics Álvaro

Matias, Peter Nijkamp, Manuela Sarmiento, 2011-07-28 The assessment of local, regional or national impacts of an influx of tourists of different kind and origin has in recent years become a new challenge for economics research in the tourism sector. There is a clear need to develop solid methodologies through which the socio-economic impacts of tourism can be assessed. Tourism impact assessment as a systematic approach to the estimation of socio-economic effects of tourism on relevant parts of the economy has become a timely response to the need for appropriate information for stakeholders both public and private. The present volume brings together a set of recent impact studies of both a theoretical, methodological and an applied policy oriented nature which have been selected on the basis of their originality or novel contribution to the research in this field. Tourism Economics Metin Kozak, 2015-09-04 This book examines tourism economics in detail providing a range of specific case studies of tourism operations in various countries across the world. The contributors to this volume are from diverse locations with ten countries across four continents represented namely Canada, China, Greece, India, Iran, Poland, Portugal, South Africa, Spain and the USA. The book is systematic in structure and thorough in content and will be useful for both academics and tourism professionals seeking to update their knowledge and practice of tourism economics and to contribute to the field by developing further research proposals at both the micro and macro levels. **Recent**

Advancements in Tourism Business, Technology and Social Sciences Vicky Katsoni, George Cassar, 2024-05-28 The book features the first volume of the proceedings of the 10th International Conference of the International Association of Cultural and Digital Tourism IACuDiT with the theme Recent Advancements in Tourism Business, Technology and Social Sciences which was held from August 29 to 31, 2023 in Crete, Greece. It showcases the latest research on Tourism Business, Technology and Social Sciences and presents a critical academic discourse on smart and sustainable practices in the tourism industry, stimulating future debates and advancing readers' knowledge and understanding of this critical area of tourism business in the post-COVID-19 era. COVID-19 produced dramatic effects on the global economy, business activities and people.

with tourism being particularly affected The book discusses the resulting digital transformation process in a range of areas including its effect on the social sciences combined with special forms of tourism This accelerated digitalization encourages the emergence of new digital products and services based on the principle of flexibility The book focuses on the knowledge economy and smart destinations as well as new modes of tourism management and development and includes chapters on emerging technologies such as the Internet of Things artificial intelligence big data and robotics in connection with various tourism practices

Tourism, Recreation and Regional Development Jean-Christophe Dissart,Jeffrey Dehez,Jean-Bernard Marsat,2016-03-03 What factors contribute to tourism and recreation development How can we characterise stakeholder rationales and organisation modes to enhance tourism resources and foster tourism and recreation services To what extent do tourism and recreation contribute to regional development What changes are taking place in terms of new destinations stakeholders policy objectives Bringing together scholars from the fields of planning economics sociology management studies and geography this book examines cross cutting issues in tourism and recreation with the aim of developing an extended view of leisure time Focusing mainly on France with comparison to the experience of Northern and Southern European countries and North America it combines a diverse range of case studies to address issues such as contrasting rural dynamics changing public policies sustainable development imperatives evolving user behaviour and increasingly diverse recreation activities and stakeholder organisation Specific topics are highlighted such as the role of social capital or culture as factors of recreation development resort organisation from international and experience based perspectives and the usefulness of the capability approach to evaluate tourism impacts on local development Emphasising policy recommendations to help public or collective action on the issues and presenting emerging trends in the field this book should be of interest to students scholars and stakeholders in tourism recreation planning and management

The Economics of Tourism Destinations Guido Candela,Paolo Figini,2012-06-30 The book aims at providing an overview of the main economic issues related to tourism activities While tourism is an important sector contributing to more than 10% of the European Union s GDP research and teaching at the university level has only recently grown to a considerable level and the field still lacks a firm research methodology This book approaches tourism economics as an applied field of study in which tourism markets are represented as imperfect markets with asymmetric and incomplete information among agents bounded rationality and with a strong presence of externalities and public goods The economic issues studied in the book are approached both intuitively largely using examples and case studies and formally with mathematical formalizations in text boxes
