

The Skate Basic Park – Intro to Energy Potential and Kinetic PhET Lab

Introduction:

When Tony Hawk wants to launch himself as high as possible off the half-pipe, how does he achieve this? The skate park is an excellent example of the **conservation of energy**. The law of conservation of energy tells us that we can never create or destroy energy, but we can change its form. In this lab, we will look at the conversion of energy between *gravitational-potential* energy, work, and *kinetic* (or moving) energy.

Use the internet, your textbook, or notes to define the following key terms:

Kinetic Energy

Potential Energy

Mechanical Energy

Joule

State, in your own words, the **Law of the Conservation of Energy**.
