AERCO KC-1000 Gas Fired Commercial Water Heating System

The AERCO KC-1000 Water Heater utilizes state-of-the-art technology to easily meet highly demanding commercial and institutional hot water requirements in a compact and reliable condensing design. The AERCO modulating concept quickly and efficiently maintains precise water temperature control for all flow requirements. Water heating thermal efficiencies can range from 80% to 88+% (at efficiency actually increased at lower loads due to its unique inverse efficiency curve).

The advanced control system of this KC-1000 modulates the burner to the precise point needed to exactly match input load. This is done over a 20:1 ratio from 1,000,000 BTU/hr. to 50,000 BTU/hr. in as little as 4 seconds if necessary. Wasteful overshooting and cycling are virtually eliminated as are storage tanks, mixing valves and other temperature averaging components in most applications. The set point is adjustable from 120°F to 200°F and control is $\pm 4^\circ\text{F}$ is easily achieved. Direct venting, sealed combustion and convenient vent capabilities provide correct installation flexibility. Small foot print, storage tank, and quiet operation make it ideal for retrofit. Tight temperature control, high efficiency, reliability and longevity make the KC-1000 water system a truly unique and advanced design.
