1941-1945 David S. Wyman,2019-07-31 In this landmark study a sequel to Paper Walls America and the Refugee Crisis 1939 1941 his study of America s restrictive pre World War II immigration policies David S Wyman documents how FDR s administration especially the State Department refused to undertake serious efforts to rescue European Jews from the Holocaust and argues that a commitment to rescue by the United States could have saved several hundred thousand victims from the Nazis The definitive work on its subject this book won the National Jewish Book Award theAnisfield Wolf Award the Present Tense Literary Award the Stuart Bernath Prize from the Society for Historians of American Foreign Relations and the Theodore Saloutos Award of the Immigration History Society and was nominated for the National Book Critics Circle Award Wyman s earlier work on prewar American attitudes to refugees from Hitler s expanding Reich Paper Walls America and the Refugee Crisis 1938 1941 has admirably equipped him to pursue the shameful story into the war years when the incredulity of those in a position to know the deliberate obstructionism of xenophobic and anti Semitic officials and extravagant bureaucratic infighting within the Jewish community no less than in Government meant not merely agonizing delay but death for thousands who could have been rescued His research in widely scattered sources meticulously reconstructs a complex story from which very few individuals emerge with credit and some notably President Franklin D Roosevelt stand clearly indicted for a cold indifference in practice utterly at variance with lofty humanitarian sentiments publicly proclaimed for political advantage Mr Wyman s analysis exemplary in its clarity and thoroughness adopts a judicious tone and preference for marshaling evidence rather than apportioning blame That evidence is cumulatively devastating implicating both passive bystanders and perpetrators in the vast crime that Mr Wyman himself a non Jew reminds us was a tragedy not only for the Jewish people but for all human beings A J Sherman The New York Times Wyman subjects the American record during the Holocaust to the closest scrutiny it has yet received It is the meticulously documented detail that makes the impact of his book shocking disturbing and unforgettable The documents that Mr Wyman quotes in grim abundance cold blooded private memoranda pettifogging evasions flagrant lies establish beyond any possible doubt that neither the relevant State Department officers nor their opposite numbers in the British Foreign Office had the slightest intention of allowing more than a token handful of Jews to be rescued John Gross The New York Times A monumental volume sweeping in its scope stunning in its insight and enduring in its importance A damning indictment Wall Street Journal One of the most powerful books I have ever read Senator Paul Simon Impressively researched balanced in its judgments devastating in its discussion of untaken opportunities and informed by an essentially moral purpose The Abandonment of the Jews makes a clear largely persuasive argument Richard S Levy Commentary Magazine Never before has the evidence been marshaled so painstakingly

Non-Canonically Case-Marked Subjects Jóhanna Barðdal,Na'ama Pat-El,Stephen Mark Carey,2018-10-15 Interest in non canonically case marked subjects has been unceasing since the groundbreaking work of Andrews and Masica in the late 70 s who were the first to document the existence of syntactic subjects in another morphological case than the nominative Their research was focused on Icelandic and South Asian languages respectively and since then oblique subjects have been reported for language after language throughout the world This newfangled recognition of the concept of oblique subjects at the time was followed by discussions of the role and validity of subject tests discussions of the verbal semantics involved as well as discussions of the theoretical implications of this case marking strategy of syntactic subjects This volume contributes to all these debates making available research articles on different languages and language families additionally highlighting issues like language contact differential subject marking and the origin of oblique subjects **Some Account of the Chapel of Our Lady, in the Priory Church of St. Mary Overy, Southwark, etc** Edward John CARLOS,1832 **Sources of London English** Laura Wright,1996 The macaronic mixed language business texts of London for the period 1275 to 1500 present a rich source of evidence for the medieval dialect of London English Hitherto they have been ignored because of mistaken ideas about their value they have been viewed as bastardized forms produced by ill educated scribes We cannot dismiss macaronic documents as debased or degenerate without investigation nor should we underestimate the evidence they present for the development of the English language The contemporary importance of these documents is attested by their sheer number it is easier today to find macaronic business documents from the late medieval period in record offices than it is to find monolingual texts The book focuses on terminology surrounding the River Thames to present a study of the medieval dialect of London The vocabulary survey lists many words which had previously been lost to us and the illustrative extracts from the texts present a fascinating picture of life in medieval times on the River Thames The author s analysis covers the orthography phonology and morphology of the dialect as revealed in these texts **Internal Revenue Bulletin** United States. The 1st and 2nd International Conferences on Functional Imaging and Modelling of the Heart FIMH were held in Helsinki Finland in November 2001 and in Lyon France in June 2003. These meetings were born through a fruitful scientific collaboration between France and Finland that outreached to other groups and led to the start of this biennial event. The FIMH conference was the first attempt to agglutinate researchers from several complementary but often isolated fields: cardiac imaging, signal and image processing, applied mathematics and physics, biomedical engineering and computer science, cardiology, radiology, biology and physiology. In the first two editions, the conference received an enthusiastic acceptance by experts of all these communities. FIMH was originally started as a European event and has increasingly attracted more and more people from the US and Asia. This edition of FIMH received the largest number of submissions so far, with a result of 47 papers being accepted as either oral presentations or posters. There were a number of submissions from non EU institutions which confirms the growing interest in this series of meetings. All papers were reviewed by up to four reviewers. The accepted contributions were organized into 8 oral sessions and 3 poster sessions, complemented by a number of invited talks. This year we tried to allocate as many papers as possible as oral presentations to facilitate more active participation and to stimulate multidisciplinary discussions.

Cratering in Marine Environments and on Ice Henning Dypvik, Mark J. Burchell, Philippe Claeys, 2013-06-29. Despite their global importance, little is known about the few existing examples of impacts into marine environments and icy targets. They are among the least understood and studied parts of impact crater geology. The icy impacts are also of great importance in understanding the developments of the outer planets and their satellites such as Mars or Europa. Furthermore, the impact mechanisms, crater formation and collapse, melt production and the ejecta distribution are scarcely known for impact on targets other than the classical solid silicates of the continental crust. The reaction of water and ice to impacts clearly deserves a more thorough study. The understanding of impact effects and consequences in the case of aqueous hits, soft sediments and icy targets has not been thoroughly explored and comprises the main focus of this book. A number of papers in the field of hypervelocity impacts on ice are included. These cover a review of available literature in the field of laboratory studies of such impacts, large impact structures on Titan, predicting impact cratering on a comet nucleus and a novel report on the survival of bacteria fired at hypervelocity into icy surfaces. This latter paper is concerned with astrobiology and in particular panspermia, natural migration of life through space.
