## **African Health Leaders Making Change And Claiming The Future:**

**African Health Leaders** Francis Omaswa, Nigel Crisp, 2014-08-28 Most accounts of health and healthcare in Africa are written by foreigners African Health Leaders Making Change and Claiming the Future redresses the balance Written by Africans who have themselves led improvements in their own countries the book discusses the creativity innovation and leadership that has been involved tackling everything from HIV AIDs to maternal and child mortality and neglected tropical diseases It celebrates their achievements and shows how over three generations African health leaders are creating a distinctively African vision of health and health systems The book reveals how African Health Leaders are claiming the future in Africa but also by sharing their insights and knowledge globally and contributing fully to improving health throughout the world It illustrates how African leadership can enable foreign agencies and individuals working in Africa to avoid all those misunderstandings and misinterpretations of culture and context which lead to wasted efforts and frustrated hopes African Health Leaders challenges Africans to do more for themselves build on success tackle weak governance corrupt systems and low expectations and claim the future It sets out what Africa needs from the rest of the world in the spirit of global solidarity not primarily in aid but through investment collaboration partnership and co development It concludes with a vision for improvement based on three foundations an understanding that health is made at home the determination to offer access to health services for everyone and an insistence on the pursuit of quality *One World Health* Lord Nigel Crisp, 2016-06-08

This brand new textbook presents a new approach to the teaching and understanding of global health It describes the shared opportunities but also the problems that we all face wherever we live and the particular needs of the poorest people in every society Covering subjects from epidemics and climate change the need to staff and resource health services appropriately the rich potential of science and technology and the impacts of social and political change in the world around us all is presented at a level appropriate for the student looking to gain an understanding of this broad and developing area *African*

*Leadership* Rob Elkington, Faith Wambura Ngunjiri, Gloria J. Burgess, Xoliswa Majola, Erwin Schwella, Nico de Klerk, 2023-03-14 African Leadership is an edited collection enriched by the people who have lived and experienced indigenous leadership first hand demonstrating how African leadership is distinctive from usual Western hegemonic paradigms

**African Children in Peril** Brian Waller, 2023-04-28 Why do millions of African children die before their fifth birthday In African Children in Peril Brian Waller takes his enormous experience in working with children and families both home and overseas and looks critically and boldly at why enormous numbers of infant children in sub Saharan Africa die so young This is a mortality rate of up to thirty times greater than in the West It hasn t been an accident of climate or corruption or geography It has happened because of the West s systematic subjugation and exploitation of the region over the centuries without regard to how this might impact on the region s families and very young children African Children in Peril shows emphatically and meticulously how Britain has been at the centre of this catastrophe involving many millions of child deaths

as a consequence of its involvement in the slave trade and its Imperial and colonising history It goes on to describe both America's indifference to African children's health needs and its readiness to profit from the continent at every turn But there can be hope Alongside this tragic detailing of research and conclusions Brian Waller explores Africa's positive responses to these events and suggests how the West and particularly the United States and Britain might now assist African leaders in helping them to make the curse of child malnutrition and early deaths history The time is now Global Health Risk Framework National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Health Sciences Policy, 2016-06-06 Since the 2014 Ebola outbreak many public and private sector leaders have seen a need for improved management of global public health emergencies The effects of the Ebola epidemic go well beyond the three hardest hit countries and beyond the health sector Education child protection commerce transportation and human rights have all suffered The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats many of which could disrupt global health and commerce far more than the recent outbreak In order to explore the potential for improving international management and response to outbreaks the National Academy of Medicine agreed to manage an international independent evidence based authoritative multistakeholder expert commission As part of this effort the Institute of Medicine convened four workshops in summer of 2015 to inform the commission report The presentations and discussions from the Workshop on Resilient and Sustainable Health Systems to Respond to Global Infectious Disease Outbreaks are summarized in this report **Global Health Studies** Louise Warwick-Booth, Ruth Cross, 2018-05-21 A global view of health offers a richer understanding of ways of measuring improving and sustaining health both in individual national settings and in the context of a strongly interconnected world This book draws on social scientific insights and explanations to examine trends in global health Moving beyond an epidemiological analysis the authors use a social determinants framework and life course approaches to offer a critical introduction to the study of global health Through individual chapters focusing on topics such as health policy global governance health systems and health related protests the authors present the scope of global health studies and introduce readers to broader ranging issues such as globalization and political forces Key themes such as power inequality and inequity and their impact on health on a global scale recur throughout the book International examples and case studies are used to illustrate the discussion which is further supported by opportunities for reflection and further reading This book will be an important resource for students studying global health and will have broad relevance to those undertaking health health related and allied health professional courses

**Visioning Higher Education for Contemporary Global Challenges** Peter H. Koehn, Phyllis Bo-yuen Ngai, Juha I. Dalrymple, Brian Galvin, 2020-08-24 The capacity to understand and communicate health information is a major international health concern Sponsored by the Health and Biosciences Section of International Federation of Library Associations this book highlights the contribution that librarians are making to improving health literacy and enabling citizens to be active participants in the management of their own health Knowledge is power and the World Health Organization recognizes that health literacy involving effective access to and understanding of health information is essential to health and well being in society by empowering and enabling citizens to participate in their own healthcare The book presents inspiring studies from an international group of authors showing how libraries and librarians are partnering with diverse sectors of society including universities hospitals public health clinics community based organisations voluntary bodies and government agencies to help citizens understand and manage their health It provides guidance by example to suggest how libraries can help citizens participate in their healthcare and their communities by collaborating with others to increase health literacy in society      *Decolonizing Healthcare Innovation* Matthew

Harris, 2023-08-31 This fascinating book offers a pathway for the NHS to adopt low cost but effective innovations from areas of the world traditionally seen as beneficiaries rather than providers of help and support In an era of increasing demand and dwindling resources and where the COVID 19 pandemic has illustrated the structural limitations of the current system the book provides examples of simple frugal but high quality alternatives to current practice From orthopaedics to paediatrics and mental health to plastic surgery the book illustrates how low and middle income countries have found solutions to healthcare issues that are not only safe and clinically effective but also have the potential to save the NHS millions of pounds Grounded in the contemporary debates of decolonization it invites readers to question the culture and systems in global health that view low income countries as solely passive recipients of aid The volume will be essential reading for students and scholars across Public Health Global Health and Development Studies as well as healthcare managers and policy makers in the UK and beyond      *Informed and Healthy* Maria G. N. Musoke, 2016-06-15 *Informed and Healthy* Theoretical and Applied Perspectives on the Value of Information to Health Care focuses on two major issues the value attributed to information by users and its effect on health care and a new model of information behavior in which the value of information drives various information activities unlike many information models which tend to give prominence to information needs The inductive development of the model is explained with associated implications for theory and transferability or applicability elsewhere The book uses a case study of the health information system in Uganda and expands the analysis by comparing it to other systems utilized by different countries in diverse levels of development Topics such as access and use of information value attribution and effect on health outcomes and modelling information behavior and its implications on health informatics are discussed in detail This book is a valuable resource for health professionals planners and policy makers as well as

researchers interested in health information systems and their applicability in different environments Provides a new model of information behaviour that emerges inductively from qualitative data Focuses on value of information rather than information needs Explains in detail the methodological approach used to value attribution Serves as a valuable resource for health professionals planners and policy makers as well as researchers interested in health information systems and their applicability in different environments
