Science in the Forest, Science in the Past Geoffrey E. R. Lloyd,Aparecida Vilaça,2020-12-31 This collection brings together leading anthropologists historians philosophers and artificial intelligence researchers to discuss the sciences and mathematics used in various Eastern Western and Indigenous societies both ancient and contemporary The authors analyze prevailing assumptions about these societies and propose more faithful sensitive analyses of their ontological views about reality a step toward mutual understanding and translatability across cultures and research fields Science in the Forest Science in the Past is a pioneering interdisciplinary exploration that will challenge the way readers interested in sciences mathematics humanities social research computer sciences and education think about deeply held notions of what constitutes reality how it is apprehended and how to investigate it **New Worlds from Old Texts** Elton Thomas Edward Barker,Stefan Bouzarovski,C. B. R. Pelling,Leif Isaksen,2016 Written by a highly interdisciplinary range of contributors New Worlds from Old Texts explores ancient Greek perceptions of space and how they may have differed from the modern cartographic view **Literary Geographies in Balzac and Proust** Melanie Conroy,2021-12-16 Literary geography is one of the core aspects of the study of the novel both in its realist and post realist incarnations Literary geography is not just about connecting place names to locations on the map literary geographers also explore how spaces interact in fictional worlds and the imaginary of physical space as seen through the lens of characters perceptions The tools of literary cartography and geographical analysis can be particularly useful in seeing how places relate to one another and how characters are associated with specific places This Element explores the literary geographies of Balzac and Proust as exemplary of realist and post realist traditions of place making in novelistic spaces The central concern of this Element is how literary cartography or the mapping of place names can contribute to our understanding of place making in the novel <u>Can We Be Wrong? The Problem of Textual Evidence in a Time of Data</u> Andrew Piper,2020-11-19 This Element tackles the problem of generalization with respect to text based evidence in the field of literary studies When working with texts how can we move reliably and credibly from individual observations to more general beliefs about the world The onset of computational methods has highlighted major shortcomings of traditional approaches to texts when it comes to working with small samples of evidence This Element combines a machine learning based approach to detect the prevalence and nature of generalization across tens of thousands of sentences from different disciplines alongside a robust discussion of potential solutions to the problem of the generalizability of textual evidence It exemplifies the way mixed methods can be used in complementary fashion to develop nuanced evidence based arguments about complex disciplinary issues in a data driven research environment <u>Actual Fictions</u> Roel Smeets,2022-08-11 This Element sheds a new light on the ubiquitous yet complex notion of mimesis By systematically comparing the social dynamics of the Dutch population at a given time with the social dynamics of characters in Dutch literary fiction published in the same period it aims to pinpoint the ways in and the extent with which literary fiction

either mirrors or shapes the societal context from which it emerged While close reading based scholarship on this topic has been limited to qualitative interpretations of allegedly exemplary works the present study uses the data driven tools of social network analysis to systematically determine the imitative elements of the social dynamics of characters within larger scale representative collections of books of literary fiction **The Discursive-Digital Link** Ehsan Dehghan,2025-08-22 We are in a state of crisis Democracy is under threat authoritarian politics are on the rise and digital media once heralded as emancipatory technologies are increasingly implicated in democratic erosion The Discursive Digital Link offers a critical framework for understanding the entangled relationships between discourse digital media and the hidden dynamics behind antagonism and polarisation The Discursive Digital Link presents a fluid social ontology that theorises how discourses and digital communication technologies are inseparably entangled and how this entanglement contributes to the formation of complex hierarchical relations Drawing on discourse theory and new materialist perspectives Dehghan maps how the various components of the discursive digital link users collectives identities the medium s design underlying neoliberal capitalist logics and structural power dynamics together shape antagonistic frontiers in digital spaces Through detailed case studies across multiple digital media Dehghan demonstrates how these entanglements manifest through different articulatory logics that could transform societies towards either agonistic progress or disastrous polarisation By revealing the logics of discursive digital alliances and active passivity Dehghan provides critical insights for academics activists and anyone seeking to foster progressive togetherness The Discursive Digital Link offers a powerful theoretical framework and methodology for analysing digitally mediated communication It challenges monolithic understandings of polarisation technological solutionism and symptom focused approaches instead advocating for radical structural interventions across all entangled components of the discursive digital link a necessary shift in both academic research and progressive political strategy to address the democratic crises of our time **The Challenges of Born-Digital Fiction** Dene Grigar,Mariusz Pisarski,2024-03-21 The Challenges of Born Digital Fiction Editions Translations and Emulations addresses the growing concern about how best to maintain and extend the accessibility of early interactive novels and hypertext fiction or narratives These forms of born digital literature were produced before or shortly after the mainstreaming of the World Wide Web with proprietary software and on formats now obsolete Preserving and extending them for a broad study by scholars of book culture literary studies and digital culture necessitate they are migrated translated and emulated yet these activities can impact the integrity of the reader experience Thus this Element centers on three key challenges facing such efforts 1 precision of references identifying correct editions and versions of migrated works in scholarship 2 enhanced media translation approaching translation informed by the changing media context in a collaborative environment and 3 media integrity relying on emulation as the prime mode for long term preservation of born digital novels Worldwide Language Service Infrastructure Yohei Murakami,Donghui Lin,2016-03-22 This book constitutes the refereed post workshop proceedings of the Second International

Workshop on Worldwide Language Service Infrastructure WLSI 2015 held in Kyoto Japan in January 2015 The 4 full papers included in this volume and presented together with 2 short papers and 8 invited papers were carefully reviewed and selected from 7 submissions The papers are categorized into four parts introducing metadata and annotations providing technologies for language service platforms atomic language services across different interfaces policies and development of language resources and services and collecting reports on language service application   *Gender and Prestige in Literature* Alexandra Dane,2020-07-10 Gender and Prestige in Literature Contemporary Australian Book Culture explores the relationship between gender power reputation and book publishing s consecratory institutions in the Australian literary field from 1965 2015 Focusing on book reviews literary festivals and literary prizes this work analyses the ways in which these institutions exist in an increasingly cooperative and generative relationship in the contemporary publishing industry a system designed to limit field transformation Taking an intersectional approach this research acknowledges that a number of factors in addition to gender may influence the reception of an author or a title in the literary field and finds that progress towards equality is unstable and non linear By combining quantitative data analysis with interviews from authors editors critics publishers and prize judges Alexandra Dane maps the circulation of prestige in Australian publishing addressing questions around gender identity literary reputation literary worth and the resilience of the status quo that have long plagued the field
