

## Affordable Care Act and Readmission Essay

The Affordable Care Act (ACA) enacted in March 2010 aims at making health insurance available and cost affordable to many more Americans. It provides Americans with house hold income between 100% - 400% of federal poverty level with premium tax credits that allows them to obtain insurance at a lesser cost, (kff.org, 2017). While not all states have the Medicaid expansion program, the ACA aims at expanding the Medicaid program to cover all adults with income below 138% of the federal poverty level. It also supports innovative medical care delivery methods designed to lower general healthcare cost. As a result of all these goals, the ACA came with several regulations aimed at reducing medical cost, improve patient quality of care and ensure better outcome. One of these regulations is contained in its section 3025. It levies penalties upon hospitals with excess readmission rate within 30 days.

Summarize the provision and how it was intended to achieve higher value Hospitalizations can be stressful and even worst when it results to a subsequent readmission. As our healthcare continues to seek measures through which they can improve quality of care at a lesser cost, section 3025 of the Affordable Care Act of 2010 introduced the Hospital Readmissions Reduction Program (HRRP), which requires the Centers for Medicaid Services (CMS) to reduce payments to Inpatient Prospective Payment System (IPPS) hospitals with excess 30-day readmissions for Medicare patients treated for certain conditions, effective for discharges beginning October 1, 2012. According to cms.gov (2018), these conditions include, Heart Failure (HF), Acute Myocardial Infarction (AMI), Pneumonia, Chronic Obstructive Pulmonary Disease (COPD), Total Hip/Total Knee Arthroplasty, and Coronary Artery Bypass Graft (CABG). Hospitals with any of the above measures having less than 25 cases under this provision are not considered to be having excess readmission ratio for that condition. Adjustments to a IPPS hospital's Medicare payments are made only when the hospital performance is worse than average. Hospitals located in Puerto Rico are exempted. The final readjustment factor for FY 2018 was based on the above 6 readmissions measures.

In 2013, it was estimated that more than 2200 U.S. hospitals lose over \$280 million in Medicare funds because their readmissions exceeded the expected rates stipulated by Section 3025 of the ACA. These readmissions were specifically linked to patients with congestive heart failure, pneumonia, and acute myocardial infarction (Williams, Javed, Hamid & Williams, 2014).

Synthesize the evidence about whether – when implemented – the policy has achieved higher value. The HRRP has gained significant attention since its implementation. Some experts however argue that its implementation has both positive and negative impact. According to Jencks, Williams, and Coleman (2009) nearly one in every five Medicare patients discharged from the hospital w
