Scholarship Students in Elite South African Schools Jennifer Wallace, Jennifer Feldman, 2022-11-16 This book provides a narrative account of the experiences of twenty former scholarship students from historically disadvantaged communities who attended elite public and private secondary schools It draws on in depth one on one semi structured interviews conducted with former scholarship recipients who were between the ages of 19 and 24 years at the time of the interviews Various themes are explored specifically focusing on elite schooling in relation to the experiences and navigational practices of the scholarship recipients and the adjustments that they felt they needed to make in order to fit into the elite school space The book analyses and discusses the reflective experiences of students who were awarded a scholarship to attend an elite secondary school It reveals that accepting the gift of a scholarship is far more complex multi layered and at times harsh and even painful for the individual recipients than is possibly realized by those involved in this practice This book contributes to academic educational debates within the sociology of education elite schools and schooling in the post apartheid South African context

Translanguaging, Coloniality and Decolonial Cracks Robyn Tyler, 2023-01-13 In this linguistic ethnography of bilingual science learning in a South African high school the author connects microanalyses of classroom discourse to broader themes of decoloniality in education The book challenges the deficit narrative often used to characterise the capabilities of linguistically minoritised youth and explores the challenges and opportunities associated with leveraging students full semiotic repertoires in learning specific concepts The author examines the linguistic landscape of the school and the beliefs and attitudes of staff and students which produce both coloniality and cracks in the edifice of coloniality A critical translanguaging lens is applied to analyse multilingual and multimodal aspects of students science meaning making in a traditional classroom and a study group intervention Finally the book suggests implications for decolonial pedagogical translanguaging in Southern multilingual classrooms

Government Annual Report of the Republic of Venda (South Africa), 1983 *No Lesser Place* Chris Brink, 2006-03-01 In *No Lesser Place* professor Chris Brink rector of Stellenbosch University since 2002 gives in his personal capacity an overview of and commentary on the main arguments of the taaldebate He does so against the background of the historical and current position of Afrikaans at Stellenbosch and also outlines his own position in this regard Relanguaging Language from a South African Township School Lara-Stephanie Krause-Alzaidi, 2021-12-20 Using data from a long term ethnographic study of English language classrooms in a South African township this book highlights linguistic expertise in a setting where it is not usually expected or sought Rather than being peripheral and unskilled South African township teachers and learners emerge as skilled re language users central to the workings of South African education and to our understanding of how language classrooms work This book foregrounds the heterogeneity flexibility and creativity of day to day language practices that African urban spaces are known for and

conceptualises language teaching not as a progression from one fixed language to another but as a circular sorting process between linguistic heterogeneity languaging and homogeneity a standard language *New Serial Titles* ,1991 A union list of serials commencing publication after Dec 31 1949 *Foundations of Education* E.O. Adu,M. P. Mavuso,N. S. Duku,C. C. Wolhuter,2022-10-10 Many aspiring trainee teachers enter the field of education intending to positively impact students lives However to be an effective educator one must have a solid grounding in the fundamental principles of teaching This is where a book on the foundations of learning is invaluable **Resources in Education** ,2001-10 South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI *Umrabulo* ,2001 *Papers* ,1920 Report South Africa.
