calculated risk takers They risk a lot to save a lot and conversely risk nothing to save nothing and they often find themselves operating within the gray area of those two extremes Having an understanding of the law as it applies in different situations allows the prudent fire fighter EMT supervisor manager or officer to manage legal exposure There are times when it may be necessary to assume greater legal risk because it is the right thing to do There are other times when a legal risk is not worth any potential benefit As a result it is important for those in fire and EMS disciplines to have a passing knowledge of the law and how it affects them in their profession
