Dying Justice Jocelyn Grant Downie, 2004-01-01 In *Dying Justice* Jocelyn Downie provides an up to date and comprehensive review of significant developments in the current legal status of assisted death in Canada

Inalienable Rights Terrance C. McConnell, 2000 This book explains what inalienable rights are and how they restrict the behavior of their possessors McConnell develops compelling arguments to support the inalienability of the right to life the right of conscience and a competent person's right not to have medical treatment administered without consent Yet surprisingly he argues that the inalienability of the right to life does not entail that voluntary euthanasia or assisted suicide are wrong This distinctive defense of inalienable rights will appeal to medical ethicists and other applied ethicists political theorists and philosophers of law

Philosophical Foundations of Precedent Timothy Endicott, Hafsteinn Dan Kristjánsson, Sebastian Lewis, 2023-03-27 Philosophical Foundations of Precedent offers a broad deep and diverse range of philosophical investigations of the role of precedent in law adjudication and morality The forty chapters present the work of a large and inclusive group of authors which comprises of well established leaders in the discipline and new voices in legal philosophy The magnitude of the resulting project is extraordinary presenting a diverse array of innovative and creative philosophical investigations of the practice of adhering to past decisions in law and allied fields of practical reasoning And by the same token the contributions elucidate the reasons that courts and other decision makers may have for departing from what has been done before The phenomena under investigation include the law and practice of common law and civil jurisdictions around the world In addition to its fundamental relevance to common law jurisdictions this work will be of broad and significant interest to theoretically minded audiences in continental Europe Latin America and Asia because it involves an extensive study of practices of precedent in civil law systems as well as common law systems

Climate Engineering Daniel Edward Callies, 2019-07-12 Climate Engineering A Normative Perspective takes as its subject a prospective policy response to the urgent problem of climate change one previously considered taboo Climate engineering the deliberate large scale manipulation of the planetary environment in order to counteract anthropogenic climate change encapsulates a wide array of technological proposals Daniel Edward Callies here focuses on one proposal currently being researched stratospheric aerosol injection which would spray aerosol particles into the upper atmosphere to thus reflect a small portion of incoming sunlight and slightly cool the globe This book asks important questions that should guide moral and political discussions of geoengineering Does engaging in such research lead us towards inexorable deployment Could this research draw us away from the more important tasks of mitigation and adaptation Should we avoid risky interventions in the climate system altogether What would legitimate governance of this technology look like What would constitute a just distribution of the benefits and burdens associated with stratospheric aerosol injection Who ought to be included in the decision making process Callies offers a normative perspective on these and other questions related to engineering the climate ultimately arguing for research and regulation guided by norms of legitimacy distributive justice and procedural justice

What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement D. John Doyle, 2018-09-01 This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm In the book the author critically examines technologies such as genetic engineering neural implants pharmacologic enhancement and cryonic suspension from transhumanist and bioconservative positions focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity The author also introduces the notion that death is a process rather than an event as well as identifies philosophical and

clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement Written by a physician scientist and heavily referenced to the peer reviewed medical and scientific literature the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side reading No prior knowledge of moral philosophy is assumed as the various key approaches to moral philosophy are outlined early in the book

The Complete Plays of Jean Racine Jean Racine, 2015-10-13 This is the first volume of a planned translation into English of all twelve of Jean Racine's plays a project undertaken only three times in the three hundred years since Racine's death For this new translation Geoffrey Alan Argent has taken a fresh approach he has rendered these plays in rhymed heroic couplets While Argent's translation is faithful to Racine's text and tone his overriding intent has been to translate a work of French literature into a work of English literature substituting for Racine's rhymed alexandrines hexameters the English mode of rhymed iambic pentameters a verse form particularly well suited to the highly charged urgency of Racine's drama and the coiled strength of his verse Complementing the translations are the illuminating Discussions and the extensive Notes and Commentaries Argent has furnished for each play The Discussions are not offered as definitive interpretations of these plays but are intended to stimulate readers to form their own views and to explore further the inexhaustibly rich world of Racine's plays Included in the Notes and Commentary section of this translation are passages that Racine deleted after the first edition and have never before appeared in English The full title of Racine's first tragedy is *La Th ba de ou les Fr res ennemis* The Saga of Thebes or The Enemy Brothers But Racine was far less concerned with recounting the struggle for Thebes than in examining those indomitable passions in this case hatred that were to prove his lifelong focus of interest For Oedipus's sons Eteocles and Polynices the titular brothers vying for the throne is rather a symptom than a cause of their unquenchable hatred so unquenchable that by the end of the play it has not only destroyed these twin brothers but has also claimed the lives of their mother their sister their uncle and their two cousins as collateral damage Indeed as Racine acknowledges in his preface There is hardly a character in it who does not die at the end

Janie B. Butts,Karen L. Rich,2013 **Fallacies in Medicine and Health** Louise Cummings,2020-02-29 This textbook examines the ways in which arguments may be used and abused in medicine and health The central claim is that a group of arguments known as the informal fallacies including slippery slope arguments fear appeal and the argument from ignorance undertake considerable work in medical and health contexts and that they can in fact be rationally warranted ways of understanding complex topics contrary to the views of many earlier philosophers and logicians Modern medicine and healthcare require lay people to engage with increasingly complex decisions in areas such as immunization lifestyle and dietary choices and health screening Many of the so called fallacies of reasoning can also be viewed as cognitive heuristics or short cuts which help individuals make decisions in these contexts Using features such as learning objectives case studies

and end of unit questions this textbook examines topical issues and debates in all areas of medicine and health including antibiotic use and resistance genetic engineering euthanasia addiction to prescription opioids and the legalization of cannabis It will be useful to students of critical thinking reasoning logic argumentation rhetoric communication health humanities philosophy and linguistics

Research Handbook on the Economics of Criminal Law Alon Harel, Keith N. Hylton, 2012-01-01 Jeremy Bentham and Gary Becker established the tradition of analyzing criminal law in utilitarian and economic terms This seminal book continues that tradition with specially commissioned original papers that span the philosophical foundations of the use of economics in criminal law both traditional economic perspectives and behavioral and experimental approaches to the discipline The contributors examine and evaluate the optimal design of criminal law norms as well as the ideal structure of law enforcement institutions They delineate what wrongs ought to be criminalized identify the boundaries between criminal law and tort and determine the optimal size of sanctions given the differential vulnerability of victims They also analyze the special considerations that apply to the regulation of corporate crime the effects of technology on crime and the effects of the distribution of wealth on sentencing This essential Handbook provides students and scholars of criminal law and law and economics the opportunity to explore the diversity of contemporary approaches to the economics of crime Criminologists sociologists and policymakers will also find it a valuable addition to their collections

Euthanasia and Law in the Netherlands John Griffiths, Alex Bood, Heleen Weyers, 1998 The Netherlands is the only country in the world in which euthanasia under narrow defined circumstances is legally permissible Considerable attention has been paid over a number of years to the problem of regulating it and information has been systematically collected concerning actual practice Therefore the Dutch experience is of interest not only to the Dutch but to anyone who is considering whether or not to make euthanasia a legal practice This book is written for a reader without specific knowledge of law The central focus of the book is on Dutch law pertaining to euthanasia but it also considers the moral and legal principles that have played a role in the Dutch debate the available evidence bearing on actual practice and on the effectiveness of legal control It ends with some reflections on the problem of the slippery slope and the question whether the Dutch experience is exportable It includes translations of the relevant legislation including proposed reforms and of three leading cases
