result of this research is John Santrock's *A Topical Approach to Lifespan Development* 6e. Santrock 6e ensures students complete and understand the assigned material in a number of ways. Santrock's hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students' learning and performance. An adaptive learning system increases students' efficiency in studying by identifying what they know and don't know and providing in the moment guides to learning what they do not. The research and development of the 6th edition indicated that students said that highlighting connections among the different aspects of life span development would help them to better understand the concepts. This recurring theme of connections, *Developmental Connections*, *Topical Connections*, *Connecting Development to Life*, *Connecting with Careers*, and *Connections through Research*, ties together concepts from across chapters to reinforce the learning process and connects the material to students' everyday lives and future aspirations. And the new Milestones video and assessment program helps bring the course material to life so your students can witness development as it unfolds. And of course all of this material is informed by our unique board of expert contributors, a who's who of developmental psychology, who ensure the material is as accurate and up to date as possible.

Lifespan Development Janina M. Jolley, Mark L. Mitchell, 1996. The authors wrote this book to help students think like developmental psychologists. Specifically, they want students who read this book to critically examine claims about the nature and causes of development. Have a clear understanding of the major issues in developmental psychology. To understand what developmental psychologists have learned about the development of memory, intelligence, attachment, and other developmental issues.
