Summary of A Whole New Mind by Daniel Pink :Why Right-Brainers Will Rule the Future francis thomas, 2024-03-08 *A Whole New Mind* Daniel H Pink's book *A Whole New Mind Why Right Brainers Will Rule the Future* published in 2005 challenges the prevailing societal preference for left brain attributes over those of creative and empathetic right brained individuals Pink known for his works on business and human behavior contends that the era of left brain dominance is fading paving the way for holistic thinkers who will excel in the upcoming Conceptual Age He identifies six essential aptitudes crucial for professional success and personal fulfillment in this new paradigm This analysis is based on the 2006 Riverhead paperback edition of the book Historically society has favored logical and linear thinking marginalizing individuals who exhibit right brained qualities that don't neatly fit into this framework However as we transition from the Information Age to the Conceptual Age there is a growing demand for thinkers who can harness both left brain and right brain attributes Pink highlights the balanced nature of the human brain divided into two hemispheres the analytical left hemisphere and the intuitive right hemisphere *A Whole New Mind* ,2017 [Postcards from the Schoolhouse: Practitioner Scholars Examine Contemporary Issues in Instructional Leadership](#) Kimberly Kappler

The Robot Factory Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students

Quicklet on Daniel H. Pink's Drive: The Surprising Truth About What Motivates Us Paula Braun, 2012-02-16 ABOUT THE BOOK In Drive Daniel Pink makes the case that it's time to rethink our business practices The contemporary view of motivation is that if you want people to perform better you give them contingent rewards or threaten them with punishments For many twenty first century tasks

however contingent rewards such as monetary incentives do not work Incentives narrow focus and restrict possibility so they are only effective for tasks that have clear set of rules and obvious solutions Too many organizations make decisions based on management assumptions that are outdated and often do more harm than good The old way of thinking about motivation led to the collapse of the financial system in 2008 and had repercussions throughout the global economy The stakes are too high to keep operating under a flawed business as usual mentality MEET THE AUTHOR Paula Braun is a recovering bureaucrat On a whim she took a one year assignment in Iraq and followed it with another one year assignment in Afghanistan After that she needed a break so she semi retired and joined a bridge club To support her bridge habit she entered the glamorous world of freelance writing You can follow Paula on twitter paula_braun friend her on Facebook or read her lenses on Squidoo <http://www.squidoo.com/lensmasters/PaulaSquidoo> EXCERPT FROM THE BOOK The conventional view of human motivation is not only outdated it is ill prepared to handle how we organize what we do how we think about what we do and how we do what we do People are not robots programmed to maximize profits We all have internal motivators and seek self direction Continuing to operate out of the old conventional view hampers our economic progress Rewards and punishments often lead to the opposite of their intended aims They give us less of what we want by extinguishing intrinsic motivation diminishing performance crushing creativity and crowding out good behavior They also give us more of what we don't want by encouraging cheating shortcuts and unethical behavior becoming addictive and fostering short term thinking There are times when incentives and other if then type external rewards work but they often backfire because by design they limit our focus and foster short term thinking In general the less people feel controlled the better they will perform in the long run *The Art of Conscious Conversations* Chuck Wisner, 2022-10-25 Ditch the negative mental habits that derail conversations and destroy projects and discover a framework for forging authentic enduring and productive connections We live in conversations like fish live in water we're in them all the time so we don't think about them much As a result we often find ourselves stuck in cyclical patterns of unproductive behaviors We listen half heartedly react emotionally and respond habitually like we're on autopilot This book is a practical guide for thoughtfully reflecting on conversations so we can avoid the common pitfalls that cause our relationships and work to go sideways Chuck Wisner identifies four universal types of conversations and offers specific advice on maximizing the effectiveness of each Storytelling Investigate the stories we tell ourselves about ourselves and others Collaborative Explore the way our stories and other people's stories interact Creative See new possibilities and discover unforeseen solutions Commitment Make promises we know we can keep These conversations unfold sequentially our awareness of our and others stories transforms our ability to listen and collaborate which opens our thoughts to creative possibilities guiding us toward mindful agreements Our conversations at home at work or in public can be sources of pleasure and stepping stones toward success or they can cause pain and lead to failure Wisner shows how we can form a connection from the very first conversation and keep our discourse positive and productive
