 Women in Neuroanatomy article collection At present less than 30% of researchers worldwide are women Long standing  
 biases and gender stereotypes are discouraging girls and women away from science related fields and STEM research in  
 particular Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO  
 In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should

 ,1932-07      **General Anesthesia: From Theory to Experiments** Axel Hutt,Anthony G. Hudetz,2016-01-15 General  
 anesthesia is a standard medical procedure in today s hospital practice Although in most cases the administration of  
 anesthetics does not affect severely the patients health side effects of anesthesia are well known such as nausea or cognitive  
 impairment Moreover 1 2 out of 1000 patients under surgery report a partial wake up from anesthesia during the operation  
 The reason for such a partial lack of control of depth of anesthesia is that medical procedures are highly optimized based on  
 experience but the neural dynamics during general anesthesia is far from being understood One reason for this lack of  
 understanding is both the complex neural interactions of neurons on different spatial and temporal scales and the poorly  
 understood action of anesthetics on neural populations For instance anesthetic agents act on synaptic receptors on a  
 microscopic scale essentially evoking a macroscopic change of population activity such as Local Field Potentials EEG MEG or  
 resulting change of cerebral blood flow This population effect then triggers the loss of consciousness in patients This  
 Research Topic aims to address recent theoretical and experimental advances in the field The theoretical and experimental  
 studies represent a good overview over the current state of research in the field and provides a deeper insight into the  
 underlying neural mechanisms Each article in the issue focusses on a specific current research topic in general anesthesia  
 research and several articles introduce to the topic in a pedagogical way The issue covers various types of anaesthesia and  
 the most important topics in the field such as but not limited to recent advances in theoretical models and states of  
 consciousness reflected in experimental data the connectivity changes observed during anesthesia or effects of specific drugs  
 on brain activity The introduction style of the papers facilitates the reader to understand the background of the research  
 aspect and even allows readers not familiar with general anesthesia research to enter the research domain Hence the  
 Research Topic aims to provide on one hand an overview of the current state of the art and on the other hand a good starting  
 point for new researchers in the field      The Commercial & Financial Chronicle ... ,1913      **Government Reports Annual**
