The story unfolds a unique cosmology God is infinite simple and beyond attributes while creation begins not by crafting matter but by awakening potential through divine command The narrative introduces concepts like the spirit consciousness and emotion as emergent phenomena shaped by dual forces God's word and a contrasting natural inertia or memory. These elements evolve into a system of internal revelation where the soul learns through emotional cycles and spiritual focus Rather than giving theological proofs the book offers a personal cosmology one that critiques both blind faith and rigid atheism proposing instead that belief can emerge through introspection symbolic understanding and direct engagement with inner spiritual processes The Encyclopaedic **Dictionary** Robert Hunter, 1888 Universal Dictionary of the English Language: Rhe-Z Robert Hunter, 1897 International Dictionary and Cyclopædia ...
