A Water War In California English Edition:

Water is for Fighting Over John Fleck, 2016-09-01 Illuminating New York Times WIRED s Required Science Reading 2016 When we think of water in the West we think of conflict and crisis In recent years newspaper headlines have screamed Scarce water and the death of California farms The Dust Bowl returns A megadrought will grip U S in the coming decades Yet similar stories have been appearing for decades and the taps continue to flow John Fleck argues that the talk of impending doom is not only untrue but dangerous When people get scared they fight for the last drop of water but when they actually have less they use less Having covered environmental issues in the West for a quarter century Fleck would be the last writer to discount the serious problems posed by a dwindling Colorado River But in that time Fleck has also seen people in the Colorado River Basin come together conserve and share the water that is available Western communities whether farmers and city dwellers or US environmentalists and Mexican water managers have a promising record of cooperation a record often obscured by the crisis narrative In this fresh take on western water Fleck brings to light the true history of collaboration and examines the bonds currently being forged to solve the Basin s most dire threats Rather than perpetuate the myth Whiskey s for drinkin water s for fightin over Fleck urges readers to embrace a new more optimistic narrative a future where the Colorado continues to flow *Water Plans for California* Dorothy Louise Campbell Culver Tompkins, 1961

Control and Use of the Water Resources of the Missouri River Basin United States. Congress. Senate. Committee on Irrigation and Reclamation, 1944 Publication , 1991 **Biennial Report of the Department of Engineering of the State of California ...** California. Department of Engineering, 1917 *Water as an Inescapable Risk* Anja du Plessis, 2018-12-15 The book presents an interdisciplinary systematic evaluation of increasing water stress and scarcity over the globe and specifically South Africa South Africa is used as the prime example as the country is experiencing similar water challenges in terms of availability and quality as most regions across the globe Water availability is predominantly used to illustrate water scarcity however continued degradation of the world s freshwater resources by a multitude of natural and anthropogenic factors have consequently exacerbated water stress and scarcity due to it being of insufficient quality for various uses The increase of water scarcity through both natural and anthropogenic factors has in turn led to water being viewed as an increasing risk within all spheres Water as a source of conflict has come to the forefront especially within regions which struggle to meet the increasing demands from different water users and trying to achieve future sustainability of the resource The increase of water scarcity and stress as well as the continued pressure of population and economic growth has brought various new challenges into play This book focuses on water as an increasing risk over the globe and specifically South Africa by reviewing both water availability and quality evaluating water as a global and national risk The book concludes by focusing on current limitations necessary strategic actions as well as possible policy related changes which may be required to adapt to future water challenges and to lessen water as an increasing risk *Report of the State*

Water Commission of California ... California Water Commission, 1917 *All the Water the Law Allows* Christian S. Harrison, 2021-08-12 As the population of the greater Las Vegas area grows and the climate warms the threat of a water shortage looms over southern Nevada But as Christian S Harrison demonstrates in *All the Water the Law Allows* the threat of shortage arises not from the local environment but from the American legal system specifically the Law of the River that governs water allocation from the Colorado River In this political and legal history of the Las Vegas water supply Harrison focuses on the creation and actions of the Southern Nevada Water Authority SNWA to tell a story with profound implications and important lessons for water politics and natural resource policy in the twenty first century In the state with the smallest allocation of the Colorado's water supply Las Vegas faces the twin challenges of aridity and federal law to obtain water for its ever expanding population *All the Water the Law Allows* describes how the impending threat of shortage in the 1980s compelled the five metropolitan water agencies of greater Las Vegas to unify into a single entity Harrison relates the circumstances of the SNWA's evolution and reveals how the unification of local county and state interests allowed the compact to address regional water policy with greater force and focus than any of its peers in the Colorado River Basin Most notably the SNWA has mapped conservation plans that have drastically reduced local water consumption and in the interstate realm it has been at the center of groundbreaking water sharing agreements Yet these achievements do not challenge the fundamental primacy of the Law of the River If current trends continue and the Basin States are compelled to reassess the river's distribution the SNWA will be a force and a model for the Basin as a whole **The Routledge**
