Robins, 2013-11-26 This complete revision and updating of Professor Robins classic text offers a comprehensive account of the history of linguistic thought from its European origins some 2500 years ago to the present day It examines the independent development of linguistic science in China and Medieval Islam and especially in India which was to have a profound effect on European and American linguistics from the end of the eighteenth century The fourth edition of *A Short History of Linguistics* gives a greater prominence to the work of Wilhelm von Humboldt because of the lasting importance of his work on language in relation to general eighteenth century thinking and of its perceived relevance in the latter half of the twentieth century to several aspects of generative grammatical theory The final section covering the twentieth century has been rewritten and divided into two new chapters so as to deal effectively with the increasingly divergent development of descriptive and theoretical linguistics that took place in the latter half of this century Readable and authoritative Professor Robins introduction provides a clear and up to date overview of all the major issues in the light of contemporary scholarly debate and will be essential reading for undergraduate and graduate students of linguistics alike

Over the years the use of computers for research has become increasingly important in Biblical Studies However a combination of computational linguistics with diachronic text critical and text historical approaches has hardly ever taken place Quite often there is mutual misunderstanding between computational linguistics and more traditional approaches in the field of linguistics and textual analysis For example in computer assisted research of modern text corpora it is common to treat the text as an unequivocal and unidimensional sequence of characters In Biblical Studies however either text is considered an abstraction the result of a scholarly reconstruction based on the extant textual witnesses Here a fundamental difference in approach reveals itself The present volume tries to overcome the misunderstanding between the various disciplines and to establish how a fruitful interaction of information technology linguistics and textual criticism can contribute to the analysis of ancient texts It addresses questions concerning the confrontation between synchronic and diachronic approaches the role of linguistic analysis in the interpretation of texts and the interaction of linguistic theory and the analysis of linguistic data The first section of this volume contains the papers presented at the CALAP seminar 2003 In the second section different aspects of the interdisciplinary analysis are applied to a selected passage from the Peshitta of Kings      *A Short History Of Linguistics* R.
