A Training Manual For Sweet Sorghum:

Bio-Ethanol from sweet sorghum Sirinuch Chindaruska, Michela Pin, 2008-09-01 In the recent years there is a growing worldwide interest in the use of biofuels as they can reduce the CO₂ emissions of fuels used in transportation diversify energy procurement contribute to a longterm replacement for oil and offer new earning opportunities for the rural sector This book by dr Sirinuch Chindaruska and dr Michela Pin represents a humble but effective and timely contribution to assessing the role that biofuels can play It is devoted to a careful discussion of sweet sorghum as a suitable profitable promising raw material for bioethanol production including the analysis of a small scale plant Sirinuch Chindaruska e Michela Pin in modo semplice danno un contributo all attualissimo e diffuso argomento dell uso di biocarburanti nei mezzi di trasporto al fine di ridurre l emissione di CO₂ Nel libro esposta un argomentazione accurata sul sorgo zuccherino come materia prima idonea ed economicamente vantaggiosa nella produzione di bioetanolo

Industrial Crops Von Mark V. Cruz, David A. Dierig, 2014-11-17 The volume on Industrial Crop Breeding will be part of the series Handbook of Plant Breeding This volume will focus on the emerging area of plant breeding for sustainable production of transportation fuels and bio based products using the current advances in the field The book is scheduled to consist of a total number of 30 chapters divided into four sections The sections will emphasize crops being considered for different challenge areas including oil crops for biodiesel sugar starch and cellulosic crops for biofuel crops for bio products and issues and future prospects A chapter introducing the first three sections will also be included Outstanding scientists for each crop species are proposed as senior authors who may invite co authors to contribute part of a chapter to provide additional expertise or perspective The proposed authors will represent various national and international institutions to get a more diverse view on the topic and somehow get a global view on the common issues that researchers on industrial crops are facing The book will comprise primarily of specific issues available germplasm breeding techniques and potential geographical areas of production pertaining to individual crops being considered for industrial uses We hope to encourage the proposed authors of new crops to provide an estimate of the crop readiness for commercial development and discuss the limitations This book will be of interest and envisioned to serve as an updated reference to researchers in both academic and industrial setting to students and teachers of plant breeding and to policy makers who are looking for alternative solutions to dependency on imported petroleum products

Breeding Sorghum for Diverse End Uses Aruna C, K.B.R.S. Visarada, B. Venkatesh Bhat, Vilas A. Tonapi, 2018-08-22 Breeding Sorghum for Diverse End Uses is a comprehensive overview of all significant global efforts for the genetic improvement of sorghum a major crop of many semi arid nations that is suitable for a huge range of uses from human food to biofuels Split into two main sections the book initially reviews the genetic suitability of sorghum for breeding also providing the history of the genetic improvement of the grain Finally other sections look at specific breeding programs that could be improved in a number of areas including human food animal feed and industrial usage Readers in academics

research plant genetics and sorghum development will find this resource of great value In addition it is essential reading for engineers who utilize sorghum for food feed and industrial materials in industry Provides information on key advances in the genetic makeup of sorghum Allows plant breeders to apply this research to effectively breed new strains of sorghum that are dependent on final usage goals Includes the latest findings in each section to orient researchers to plans for future genetic enhancement

Genetics, Genomics and Breeding of Sorghum Yi-Hong Wang, Hari D. Upadhyaya, Chittaranjan Kole, 2014-07-08 Sorghum is one of the hardiest crop plants in modern agriculture and also one of the most versatile Its seeds provide calorie for food and feed stalks for building and industrial materials and its juice for syrup This book provides an in depth review of the cutting edge knowledge in sorghum genetics and its applications in sorghum breeding Each chapter is authored by specialists in their fields to report the latest trends and findings The book showcases the definitive value of sorghum as a model system to study the genetic basis of crop productivity and stress tolerance and will provide a foundation for future studies in sorghum genetics genomics and breeding

Biomass and Biofuels Shibu Jose, Thallada Bhaskar, 2015-04-22 The long held tenets of the energy sector are being rewritten in the twenty first century The rise of unconventional oil and gas and of renewables is transforming our economies and improving our understanding of the distribution of the world s energy resources and their impacts A complete knowledge of the dynamics underpinning energy markets is n

Refining Biomass Residues for Sustainable Energy and Bioproducts R. Praveen Kumar, Edgard Gnansounou, Jegannathan Kenthorai Raman, Baskar Gurunathan, 2019-11-08 The utilization of various types of biomass residue to produce products such as biofuels and biochemicals means biorefinery technology using biomass residues may become a one stop solution to the increasing need for sustainable non fossil sources of energy and chemicals Refining Biomass Residues for Sustainable Energy and Bioproducts Technology Advances Life Cycle Assessment and Economics focuses on the various biorefineries currently available and discusses their uses challenges and future developments This book introduces the concept of integrated biorefinery systems as well as their operation and feedstock sourcing It explores the specificities current developments and potential end products of various types of residue from industrial and municipal to agricultural and marine as well as residue from food industries Sustainability issues are discussed at length including life cycle assessment economics and cost analysis of different biorefinery models In addition a number of global case studies examine successful experiences in different regions This book is an ideal resource for researchers and practitioners in the field of bioenergy and waste management who are looking to learn about technologies involved in residue biorefinery systems how to reduce their environmental impacts and how to ensure their commercial viability Explores a range of different biorefinery categories such as industrial agricultural and marine biomass residues Includes a Life Cycle Assessment of biorefinery models in addition to costs and market analysis Features case studies from around the world and is written by an international team of authors

Bioprocessing Technologies in Biorefinery for Sustainable Production of Fuels,

Chemicals, and Polymers Shang-Tian Yang, Hesham El-Ensashy, Nuttha Thongchul, 2013-05-24 Sets the stage for large scale production of biofuels and bio based chemicals In response to diminishing supplies as well as the environmental hazards posed by fossil fuels and petrochemicals interest and demand for green sustainable biofuels and bio based chemicals are soaring Biomass may be the solution It is an abundant carbon neutral renewable feedstock that can be used for the production of fuels and chemicals Currently biorefineries use corn soybeans and sugarcane for bioethanol and biodiesel production however there are many challenges facing biorefineries preventing biomass from reaching its full potential This book provides a comprehensive review of bioprocessing technologies that use lignocellulosic biomass for the production of biofuels biochemicals and biopolymers It begins with an overview of integrated biorefineries Next it covers Biomass feedstocks including sugar starch oil and energy crops as well as microalgae Pretreatment technologies for lignocellulosic biomass Hydrolytic enzymes used in biorefineries for the hydrolysis of starch and lignocelluloses Bioconversion technologies for current and future biofuels such as ethanol biodiesel butanol hydrogen and biogas Specialty chemicals building block chemicals and biopolymers produced via fermentation Phytochemicals and functional food ingredients extracted from plant materials All the chapters have been written and edited by leading experts in bioprocessing and biorefining technologies Contributions are based on a thorough review of the literature as well as the authors firsthand experience developing and working with bioprocessing technologies By setting forth the current state of the technology and pointing to promising new directions in research Bioprocessing Technologies in Biorefinery for Sustainable Production of Fuels Chemicals and Polymers will enable readers to move towards large scale sustainable and economical production of biofuels and bio based chemicals

Agrobiodiversity - a training manual for farmer groups in East Africa Food and Agriculture Organization of the United Nations, 2018-06-26 Farmers play a crucial role in the preservation and sustainable use of agrobiodiversity In fact the diversity of species that support our current agricultural production systems has been carefully managed and shaped by farming communities over the course of the history of humankind Farmers act as custodian of the Earth s agrobiodiversity resources and play a big part in preserving traditional plant and animal varieties and the knowledge associated with these FAO has long been working on promoting approaches to agriculture that enable both the sustainable use of biodiversity resources for food and agriculture and their conservation and on supporting farmers to make informed decisions on their farm management and production practices This training manual fits in this broader commitment to support a shift towards a paradigm of agricultural production that can sustain food and nutrition security while at the same time cause the least harm to natural ecosystems The manual is intended as an introduction to agricultural biodiversity and to its relevance to different aspects of agricultural production and management for smallholder farmers in Kenya It includes eight different training modules each covering a specific aspect related to agrobiodiversity The modules are standalone and can be used independently one from the other depending on the user s or project s aim The materials were originally prepared within the

FAO Netherlands Partnership Programme FNPP and have been updated revised and published under the second phase of the European Union funded project Capacity building related to multilateral environmental agreements MEAs in Africa Caribbean and Pacific ACP countries *Socio-Economic Impacts of Bioenergy Production* Dominik Rutz, Rainer Janssen, 2014-02-23 Around the world many countries are increasing efforts to promote biomass production for industrial uses including biofuels and bio products such as chemicals and bio plastic Against a backdrop of lively public debate on sustainability bioenergy yields both positive and negative impacts upon a variety of environmental and socio economic issues These include property rights labor conditions social welfare economic wealth poverty reduction and more This book discusses the issues and impacts of bioenergy taking into account the local and regional framework under which bioenergy is produced touching upon educational level cultural aspects the history and economies of the producing countries and an array of policies including environmental and social targets The book surveys and analyzes global bioenergy production from a number of perspectives The authors illustrate the complexity of interrelated topics in the bioenergy value chain ranging from agriculture to conversion processes as well as from social implications to environmental effects It goes on to offer insight on future challenges associated with the expected boom of a global bio based economy which contributes to the paradigm shift from a fossil based to a biomass and renewable energy based economy The expert contributors include researchers investors policy makers representatives from NGOs and other stakeholders from Europe Africa Asia and Latin America Their contributions build upon the results of the Global Bio Pact project on Global Assessment of Biomass and Bio product Impacts on Socio economics and Sustainability which was supported by the European Commission in its 7th Framework Program for Research and Technological Development conducted from February 2010 to January 2013 The book benefits policy makers scientists and NGO staffers working in the fields of agriculture forestry biotechnology and energy *Biofuel Crops* Bharat P. Singh, 2013 Providing comprehensive coverage on biofuel crop production and the technological environmental and resource issues associated with a sustainable biofuel industry this book is ideal for researchers and industry personnel Beginning with an introduction to biofuels and the challenges they face the book then includes detailed coverage on crops of current importance or with high future prospects including sections on algae sugar crops and grass oil and forestry species The chapters focus on the genetics breeding cultivation harvesting and handling of each crop *Agriculture Handbook*, 1981 Set includes revised editions of some issues *THE MILLETS CRONICLES (A Nutritious Revolution)* Dr. R. P. Srivastava, Mr. Narendra Singh Solanki, Dr. Matukdhari Singh, Mr. Kamlesh Patidar, 2023-10-31 The Millet Chronicles A Nutritious Revolution serves a twofold purpose First it aims to rekindle the world's appreciation for these ancient grains and their immense potential in today's dietary landscape The book invites readers to rediscover the significance of millets as a sustainable and nutritious food source all while recognizing the traditional and cultural contexts in which they have thrived Secondly this book seeks to be a compendium of knowledge a testament to the collaborative effort of experts from various

fields including agriculture nutrition culinary arts and sustainable development Within its pages you will find a collection of insights research which sheds light on millets journey from humble grains to nutritional powerhouses As a guiding thread through The Millet Chronicles we explore the multifaceted nature of millets Readers will gain a deeper understanding of Historical Significance Delve into the rich history of millets and how they have sustained societies through the ages Nutritional Value Uncover the nutritional content of millets and their potential to address contemporary health challenges Culinary Excellence Explore diverse millet recipes from the traditional to the innovative and savour the flavours of millet based cuisines Agricultural and Environmental Impact Learn about the sustainable farming practices associated with millets and their potential to address food security and environmental sustainability Global Perspectives Discover how millets are finding their place in the world s dietary and agricultural landscape as well as the policies and initiatives supporting their resurgence Health and Wellness Explore the health benefits of millets from managing chronic diseases to promoting overall well being Future Prospects Look ahead to the potential impact of millets in a rapidly changing world and how they can contribute to a more resilient diverse and nutritious global food system Through this book we aim to foster a sense of appreciation for these incredible grains and the potential they hold to revolutionize our diets We invite readers to join us on this journey into the heart of millets to embrace the Nutritious Revolution and to become champions of a more sustainable and health conscious future

Ray,S Ramachandran,2018-08-20 Bioethanol Production from Food Crops Sustainable Sources Interventions and Challenges comprehensively covers the global scenario of ethanol production from both food and non food crops and other sources The book guides readers through the balancing of the debate on food vs fuel giving important insights into resource management and the environmental and economic impact of this balance between demands Sections cover Global Bioethanol from Food Crops and Forest Resource Bioethanol from Bagasse and Lignocellulosic wastes Bioethanol from algae and Economics and Challenges presenting a multidisciplinary approach to this complex topic As biofuels continue to grow as a vital alternative energy source it is imperative that the proper balance is reached between resource protection and human survival This book provides important insights into achieving that balance Presents technological interventions in ethanol production from plant biomass to food crops Addresses food security issues arising from bioethanol production Identifies development bottlenecks and areas where collaborative efforts can help develop more cost effective technology Progress in Soil Microbiome Research Javid Ahmad Parray,2024-11-21 This book focuses

on the latest research in soil and microbiome evaluating new and emerging innovations Recent research has connected specific microbial taxa to plant productivity and it is now possible to link changes in microbiome structure to the functioning of plants or crops due to advanced approaches It provides Insights into basic microbiome research Focusing on its applications in agriculture Soil bioremediation Environmental restoration It addresses the impact of global change on soil microbial diversity and ecosystem functions We aim to tailor microbiome applications to individual host species better improving treatment efficiency The book will discuss microbiome dynamics in various environments and their potential to improve soil and plant health to meet growing food demands It will also highlight the current developments in microbiome research and their implications for climate change

- 1 Linking the dynamics of microbial communities to microbiome function
- 2 Recent soil microbiome applications and harnessing for sustainable agriculture food security and environmental management
- 3 An advanced and elaborative view of the most recent microbiological research findings
- 4 Simple insightful illustrations of current microbial biotechnology trends
- 5 Future advances in microbial biotechnology research for sustainable development
