

"There's a lot of car love for the money,
and that rarely escapes our attention."

— *CarWeek*

Forward gear as well as it looks. That's because it was designed and engineered — and "tested" —

to fulfill a clearly defined purpose — that of moving you to our people
and why that normally, consistently, and securely.

Forward for the available engine, the standard 2.5 liter V-6 with the
development, and the optional 3.0 liter V-6 with the powertrain. With either one, overall, power output is guaranteed as
automatically innovative materials, utilizing electronic controls to optimize

shift gears.

For all four forward

gears, Ford's precision fuel control is the moving
target, which features a rack and pinion and the
ring, direct response. ES models include speed
control, variable, cruise power steering, for parking
and highway handling.

Excellent ride and handling characteristics are provided by Ford's 111 inch wheelbase and four wheel
only independent suspension, which results in substantial 7 1/2 inch wheel travel up front, and 5 1/2 inch rear
wheel travel. Five-chamber shock absorbers, 24, and shocks, as well as front and rear stabilizer bars, are
available in two choices of suspension tuning. Tuning is performance, depending on your choice
for business or comfort.

Great driver's seat, of course, don't just "suffer." That's created component by
component, system by system, via steering, brakes and suspension. They come together in
and driving situations on both wet roads and
public roads. A lot of input that from
million miles were driven during the forward
development program to ensure that it met our objectives —
and your expectations.

When it all comes, it comes, in the end of driving
experiences that move forward in another level of stability.
We call it "active safety." The engineers call it "safety."
