Competition Law and Regulation in European Telecommunications Pierre Larouche, 2000-05-24 Using numerous practical examples this book examines the evolution of EC telecommunications law following the achievement of liberalisation the main policy goal of the 1990s After reviewing the development of regulation in the run up to liberalisation the author identifies the methods used to direct the liberalisation process and tests their validity in the post liberalisation context A critical analysis is made of the claim that competition law will offer sufficient means to regulate the sector in the future Particular emphasis is given to the way in which EC Competition Law changed in the 1990s using the essential facilities doctrine an expansive non discrimination principle and the policing of cross subsidisation to tackle what were then thought of as regulatory matters Also examined within the work is the procedural and institutional interplay between competition law and telecommunications regulation In conclusion Larouche explores the limits of competition law and puts forward a long term case for sector specific regulation with a precise mandate to ensure that the telecommunications sector as a whole fulfils its role as a foundation for economic and social activity **Popular Science**, 1983-02 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
