Whether at home or on the move, at work or at play, the modern data network is a part of our daily lives. Streaming video, social media, and web browsing are just a few of the popular applications that rely on the network, and this list will continue to grow with autonomous vehicles, virtual reality, and others, each with their own unique needs. To address the challenges of the demand for these services, the network must continually evolve with new technologies. However, determining which technologies are worth focusing on today is difficult, and the issues which they represent and address are often complex. In *Network Horizons: Emerging Technologies and Applications 2018-2019 Edition*, the author highlights key areas of interest for network technology, helping the reader to identify those of the highest importance by explaining the what, why, and when of each of these important areas of development to make sure they and their business are prepared for the future.
