Early Childhood Identity Rita Chen, 2009 Researchers in a range of fields have acknowledged that childhood is a construct emerging from modernist perspectives that have not always benefited those who are younger The purposes of the Rethinking Childhood series are to provide critical locations for scholarship that challenges the universalization of childhood and introduces new reconceptualized and critical spaces from which opportunities and possibilities are generated for those who are younger Diverse histories and cultures are considered of major importance as well as issues of critical social justice [Education Regulations](#) United States. Dennisha Murff, 2020-01-01 In Culturally Responsive Pedagogy Promising Practices for African American Male Students I take us on a journey into teachers perceptions of the impact of implementing culturally responsive pedagogical CRP practices on the student learning outcomes of African American male students The book also helps to identify teachers perceptions of the CRP strategies needed in the elementary school setting to address the diverse needs of African American male students I share the story of educators from a large diverse elementary school in an urban school district who have made it their mission to provide African American male students with culturally responsive learning environments where they can thrive Throughout the book I make it clear that the implementation of CRP practices has a direct impact on the student learning outcomes of African American male students The book provides additional research into the existing literature on CRP practices Through a case study approach my work allows for additional insight into the potential impact of CRP practices on the student learning outcomes of African American male students in an urban elementary school setting The book takes us on a journey of highs and lows ups and downs and failures and successes Throughout the book rich detailed stories and descriptions are shared based on classroom observations interviews and student learning outcomes collected from three elementary school teachers from diverse backgrounds and various years of experience Classroom observations were conducted using the Culturally Responsive Instruction Observation Protocol CRIOP instrument to assess the practices being

implemented in the classroom As I focused on the hard realities that face African American male students in today s classrooms I identified six emerging themes including one overarching emerging theme and three promising practices that surfaced during my research The CRP practices implemented proved helpful toward increasing learning outcomes for African American male students and ultimately closing the achievement gap As an African American educator I have been able to see how the lack of culturally responsive practices creates learning obstacles for African American male students These learning obstacles continue to plague a group that has been historically marginalized in our society The implementation of CRP practices provides educators with an avenue to remedy a social justice issue that has plagued our nation for years The information shared in this book can be beneficial for all those invested in closing the achievement gap and increasing student learning outcomes through the use of culturally responsive practices including pre service and in service teachers administrators caregivers community advocates educational researchers and policy makers
