proprietor Betty Martinez serves coffee that tastes like memories while her wall of dog portraits holds secrets that could help Jeff finally find his voice if he's brave enough to face what he's been running from

A Mother's Heart introduces us to Sophia Greenwood whose young daughter has just been diagnosed with the same heart condition that claimed Sophia's mother. As she grapples with this inherited legacy of both loss and love, Sophia finds herself guided to The Smiling Dog Caf by an Irish Setter who seems to know exactly what her heart needs. There, surrounded by Betty's gentle wisdom and the caf's subtle magic, Sophia discovers that some inheritances are stronger than fear. Drawing on the Japanese tradition of healing fiction while grounding itself firmly in American soil, The Smiling Dog Caf explores how we heal from past wounds, find courage to face our futures, and learn to trust love again. Through Betty's carefully crafted coffee blends and the watchful eyes of her painted dogs, these stories remind us that sometimes the path to healing requires a little magic, a lot of courage, and the perfect cup of coffee. The book you didn't know you needed but now can't live without.

Education is Special for Everyone

Janet Mulvey, Bruce S. Cooper, Kathryn Accurso, Karen Gagliardi, 2014-07-07

Reform in education has focused mainly on development of new programs and procedures to increase the achievement of the student in the classroom. Teacher evaluations are now based on how students perform in their classrooms on yearly standardized tests. The advent of integrating students with special needs into the regular classroom has brought both benefits and concerns for average and above average students. Special education in the United States has evolved from institutional and segregated environments to inclusion in the regular education classrooms. We examine how the practice has affected all students and question whether this change has created equal opportunity for those students without special education needs. This book researches and reports on issues of current practice: e.g., teacher preparation, placement of students with special needs, implications for the average and above in the classroom, and the financial costs driving placement decisions in the education system. We examine the lowering of standards so all can pass tests, report on loss of engagement of students by middle school, and mourn the squandering of creativity to appease a mandate. Sir Ken Robinson relates that Education is meant to take us into a future we cannot even grasp. Yet we continue on a road that lowers our educational ranking internationally. We recommend to provide services for all students and take the system from its current state to one that provides a Free and appropriate education for all.
