Verhaltensökonomik und Normativität Philipp Hacker,2017-06-21 English summary People make mistakes for example in purchase or investment decisions Novel strategies of regulation seek to use these insights However they can only unfold their full potential once they are reconciled with core legal principles Eventually in this way fair behaviour may even be legally promoted German description Verhaltensökonomisch basierte Regulierung von Nudging bis Debiasing hat längst auch Deutschland und Europa erreicht Doch die Implikationen der Verhaltensökonomik für Normsetzung sind nicht immer so eindeutig wie sie auf den ersten Blick erscheinen mögen Auf empirischer Ebene herrscht Unsicherheit über den tatsächlichen Rationalitätsgrad von Marktakteuren auf normativer Ebene Unklarheit darüber welche rechtspolitischen Ziele mithilfe der neuen Techniken verfolgt werden sollen Philipp Hacker nimmt sich dieser Herausforderungen an begründet entscheidungstheoretisch die Relevanz der Verhaltensökonomik für das Privatrecht und macht sich für ihren Einsatz zur Steigerung von Fairness in Marktkontexten stark besonders im Verbraucher und Kapitalmarktrecht Auf dieser Grundlage erfährt das Informationsmodell das zentrale europäische Regulierungsparadigma eine Neukonzeption **Enrichment at the Claimant's Expense** Eli Ball,2016-12-15 This book presents an account of attribution in unjust enrichment Attribution refers to how and when two parties a claimant and a defendant are relevantly connected to each other for unjust enrichment purposes It is reflected in the familiar expression that a defendant be enriched at the claimant s expense This book presents a structured account of attribution consisting of two requirements first the identification of an enrichment to the defendant and a loss to the claimant and secondly the identification of a connection between that enrichment and that loss These two requirements must be kept separate from other considerations often subsumed within the expression enrichment at the claimant s expense which in truth have nothing to do with attribution and which instead qualify unjust enrichment liability for reasons that should be analysed in their own terms The structure of attribution so presented fits a normative account of unjust enrichment based upon each party s exchange capacities A defendant is enriched when he receives something that he has not paid for under prevailing market conditions while a claimant suffers a loss when he loses the opportunity to charge for something under the same conditions A counterfactual test asking whether enrichment and loss arise but for each other

provides the best generalisation for testing whether enrichment and loss are connected thereby satisfying the requirements of attribution in unjust enrichment Bycatch Management and the Economics of Discarding Sean Pascoe, Food and Agriculture Organization of the United Nations, 1997-01-01 The increase in commercial fisheries production over the last 50 years has been accompanied by an increase in the level of incidental catch and discarding of a number of species Approximately one quarter of the marine commercial catch destined for human consumption is discarded at sea This has raised the concern of a number of groups in society including environmentalists humanitarians and fishers themselves In this paper the economic incentives to discard fish are examined The effects of different management policies on these incentives are also investigated The concept of an optimal level of discarding is discussed taking into account the externalities that can be created by discarding Finally the effectiveness of various measures to reduce the level of discarding is reviewed these including technical administrative and economic measures The Practical Real-Time Enterprise Bernd Kuglin, Heinz Thielmann, 2005-08-15 Speed as a factor for success Our modern industrial society lives life in the fast lane The catchwords faster shorter more powerful reflect what we experience in almost all aspects of our lives Whether at home or at work we are constantly on the move and in a rush In our private lives we find rapid exchange of information most entertaining and we are fascinated by the wide range of information that pours in on us from all around the world mainly via the new media It gives us the feeling of being a part of the action everywhere and all the time Seldom are we aware that the only reason this flood of information often referred to as overstimulation does not lead to overkill is that we manage to organize our time effectively There are many parallels to this in the business world Here too a great deal of time pressure is exerted from outside goals are set ever higher and deadlines become tighter In other words demands on our time demand faster reaction Crucial information travels around the globe across all time zones in a matter of seconds In fact instead of CET or CEST it would make sense to have a single time zone for the worldwide network called GST for Global Simultaneous Time In business more so than in private life we are almost constantly online Books in Print , 1991 From Net Neutrality to ICT Neutrality Patrick Maillé, Bruno Tuffin, 2022-11-05 This book discusses the pros and cons of information and communication ICT neutrality It tries to be as objective as possible from arguments of proponents and opponents this way enabling readers to build their own opinion It presents the history of the ongoing network neutrality debate the various concepts it encompasses and also some mathematical developments illustrating optimal strategies and potential counter intuitive results then extends the discussion to connected ICT domains The book thus touches issues related to history economics law networking and mathematics After an introductory chapter on the history of the topic chapter 2 surveys and compares the various laws in place worldwide and discusses some implications of heterogeneous rules in several regions Next chapter 3 details the arguments put forward by the participants of the net neutrality debate Chapter 4 then presents how the impact of neutral or non neutral behaviors can be analyzed mathematically with sometimes counter intuitive results and emphasizes the interest

of modeling to avoid bad decisions Chapter 5 illustrates that content providers may not always be on the pro neutrality side as there are situations where they may have an economic advantage with a non neutral situation e g when they are leaders on a market and create barriers to entry for competitors Another related issue is covered in chapter 6 which discusses existing ways for ISPs to circumvent the packet based rules and behave non neutral without breaking the written law Chapter 7 gives more insight on the role and possible non neutral behavior of search engines leading to another debate called the search neutrality debate Chapter 8 focuses on e commerce platforms and social networks and investigates how they can influence users actions and opinions The issue is linked to the debate on the transparency of algorithms which is active in Europe especially Chapter 9 focuses on enforcing neutrality in practice through measurements indeed setting rules requires monitoring the activity of ICT actors in order to sanction non appropriate behaviors and be proactive against new conducts The chapter explains why this is challenging and what tools are currently available Eventually Chapter 10 briefly concludes the presentation and opens the debate
