Name: _____

Each person below was important to the Scientific Revolution. Click on the names to be taken to a website that has the answer to the listed questions.

Make sure you read the information fully and answer the questions thoroughly!

Copernicus

1. Where was Copernicus born and what did he do in his early life?

He was born in Poland. In his early life, he went to university and studied the science of the universe.

2. Besides astronomy, what did Copernicus study in school?

He studied math and astronomy. Afterward, he studied the universe.

3. What different occupations did Copernicus engage in?

Copernicus was a doctor, lawyer, judge, and a tax collector.

4. What was Copernicus' Heliocentric Theory?

The Heliocentric Theory was that the sun was the center of the universe.

5. When did Copernicus reportedly receive a copy of his printed theory?

He got his printed theory after he died. In my opinion, the publishers were really slow if he had to wait until he died to receive a copy.

Galileo

1. What invention did Galileo improve upon?

The telescope.

2. What did he discover with his new invention?

He discovered the moons of Jupiter, the rings of Saturn and the phases of Venus.

3. Which early scientist did Galileo's teachings support? What was the church's response?

His early teachings supported Pope. The church rejected his teachings. He was put on trial and then rejected.

4. What was he convicted of and what was the disposition of his sentence?

He was convicted of conspiracy to commit heresy. He was house-bound for eight years following the trial.

Isaac Newton

1. What caused Newton to begin to study the idea of gravity?

Watching an apple fall from a tree in an orchard.

2. Besides his work with the law of gravity, what were Newton's other interests?

Chemistry and working with metals (otherwise known as alchemy)

3. What were Newton's posthumous (after death) publications?

Chronology of Ancient Kingdoms amended and the system of the world.

Reflection: Of the three scientists you read about, who do you think left the greatest impact? Explain.

I personally think that Sir Isaac Newton left the biggest impact on the world as we know it. He was the one that discovered gravity existed, and if we didn't have that knowledge than we wouldn't have been able to make as many inventions or things we have today. We wouldn't have gone to space.

Osler, 2000 [What Was Revolutionary About the Scientific Revolution?](#) , [The Scientific Revolution Revisited](#) Mikulás Teich, 2020-10-09 The Scientific Revolution Revisited brings Mikul's Teich back to the great movement of thought and action that transformed European science and society in the seventeenth century Drawing on a lifetime of scholarly experience in six penetrating chapters Teich examines the ways of investigating and understanding nature that matured during the late Middle Ages and the Renaissance charting their progress towards science as we now know it and insisting on the essential interpenetration of such inquiry with its changing social environment The Scientific Revolution was marked by the global expansion of trade by

European powers and by interstate rivalries for a stake in the developing world market in which advanced medieval China remarkably did not participate. It is in the wake of these happenings in Teich's original retelling that the Thirty Years War and the Scientific Revolution emerge as products of and factors in an uneven transition in European and world history from natural philosophy to modern science, feudalism to capitalism, the late medieval to the early modern period. With a narrative that moves from pre-classical thought to the European institutionalisation of science and a scope that embraces figures both lionised and neglected such as Nicole Oresme, Francis Bacon, Thomas Hobbes, Isaac Newton, René Descartes, Thaddeus Hagecius, Johann Joachim Becher, *The Scientific Revolution Revisited* illuminates the social and intellectual sea changes that shaped the modern world. The Invention of Science David Wootton, 2015-12-08. This fantastic revisionist history captures the excitement of the scientific revolution and makes a point of celebrating the advances it ushered in. *Financial Times*: We live in a world transformed by scientific discovery. In *The Invention of Science*, historian David Wootton reveals why the Scientific Revolution was truly the greatest event in our history. Spanning continents and centuries, Wootton chronicles the factors that led to this crucial transformation and the fascinating people who made it happen. Wootton argues that the Scientific Revolution was actually five separate yet concurrent events that merged to create a new worldview. Here are the brilliant iconoclasts: Galileo, Copernicus, Brahe, Newton, and many more curious minds from across Europe whose studies of the natural world challenged centuries of religious orthodoxy and ingrained superstition. From gunpowder technology, the discovery of the new world, movable type, printing, perspective painting, and the telescope to the practice of conducting experiments, the laws of nature, and the concept of the fact, Wootton shows how these discoveries codified into a social construct and a system of knowledge. Ultimately, he makes clear the link between scientific discovery and the rise of industrialization and the birth of the modern world we know.

The Scientific Revolution Peter Harman, 2013-04-15. Originally published in 1983, this volume outlines some of the important innovations in astronomy, natural philosophy, and medicine which took place in the sixteenth and seventeenth centuries and shows how the transformation in world view during the period was affected by broader historical themes. Themes such as the spread of Puritanism, the decline of witchcraft and magic, and the incorporation of science as an integral part of the intellectual milieu of late seventeenth century England.
