*Education for Knowing* Paul A. Wagner, Frank K. Fair, 2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of thing Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students Resources in Education ,1989 Humanizing Technology Elizabeth Gerver, 2012-12-06 A few years ago a book of this type and style could not or would not have been written This is because until a few years ago no real in depth knowl edge of computers and computerized equipment was at the disposal of those with a nonscience nonquantitative background Some people from other disciplines including business the arts and the social sciences had been working with such equipment but they had gone over and tended to be even more computer conscious than those whom they served It is only comparatively recently that people like Elisabeth Gerver with a firm arts and adult education background first of all became knowledgeable and then remained true to that background To her eternal credit Elisabeth Gerver when she became involved avoided being sucked into the world of the jargon or even that of the thinking of the computer scientists and the electronic engineers On the contrary she insisted that she was an educated woman dealing with other educated people and that they would all speak in the language of everyday discourse It worked One consequence of her experience and her thought is this remarkably lucid and readable book It will prove to be of immense value to many in the world of adult and community education But the beneficiaries will run beyond those sectors of society Other people with a nonscience nonquantitative background will surely find it of immense value in their early inevitably hesitant and faulty grappling with the world of new technology *World History* ,2000 *Books in Print* ,1962 **The Publishers Weekly** ,1919 **Defending Hypatia** Robert Goulding, 2010-06-09 Why should mathematics the purest of sciences have a history Medieval mathematicians took little interest in the history of their discipline Yet in the Renaissance the history of mathematics flourished This book explores how Renaissance scholars recovered and reconstructed the origins of mathematics by tracing its invention in prehistoric Antiquity its development by the Greeks and its transmission to modern Europe via the works of Euclid Theon and Proclus The principal architects of this story the French philosopher and University of Paris reformer Peter Ramus and his critic the young Oxford astronomy lecturer Henry Savile

worked out diametrically opposed models for the development of the mathematical arts models of historical progress and decline which mirrored each scholar's larger convictions about the nature of mathematical thinking the purpose of the modern university and the potential of the human mind In their hands the obscure story of mathematical history became a site of contention over some of the most pressing philosophical and pedagogical debates of the sixteenth century *Journal of Computer-based Instruction* ,1978 **The American Educational Catalogue** ,1919 *Ate Wh* Holt Rinehart & Winston,2000 **Journal of Education and School World** ,1905 Collegian ,1914 **Publishers Weekly** ,1920 **The Collegian and Progress of India** ,1914 **The Nation** ,1896 **Bulletin of the American Mathematical Society** American Mathematical Society,1926 The American Bookseller ,1890 **the educational times** ,1882
