Ethnographic Practice in the Present Marit Melhuus, Jon P. Mitchell, Helena Wulff, 2010 In its assessment of the current state of play of ethnographic practice in social anthropology this volume explores the challenges that changing social forms and changing understandings of the field pose to contemporary ethnographic methods These challenges include the implications of the remarkable impact social anthropology is having on neighboring disciplines such as history sociology cultural studies human geography and linguistics as well as the potential costs of this success for the discipline Contributors also discuss how the ethnographic method is influenced by current institutional contexts and historical traditions across a range of settings Here ethnography is featured less as a methodological tool box or technique but rather as a subject on which to reflect

Locating the Field Simon Coleman, Peter Collins, 2020-09-09 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated This book takes a critical look at the latest developments and key issues in fieldwork The nature of locality itself is problematic for both research subjects and fieldworkers on the grounds that it must now be maintained and represented in relation to widening and fragmenting social frames and networks Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison From the social space of a cybercafe to cities in India the UK and South Africa among others this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of locality and site It shows that rather than taking key fieldwork processes such as globalization and mobility for granted anthropologists are well placed to examine and critique the totalizing assumptions behind these notions

The

SAGE Handbook of Fieldwork Dick Hobbs, Richard Wright, 2006-01-26 Fieldwork is widely practiced but little written about yet accounts of the exotic mundane complex and often dangerous are central to not only sociology and anthropology but also geography social psychology and criminology This handbook presents the first major overview of this method in all its variety introducing the reader to the strengths weaknesses and real world applications of fieldwork techniques *Transcultural English Studies* Frank Schulze-Engler, Sissy Helff, 2009 What is most strikingly new about the transcultural is its sudden ubiquity Following in the wake of previous concepts in cultural and literary studies such as creolization hybridity and syncretism and signalling a family relationship to terms such as transnationality translocality and transmigration transcultural terminology has unobtrusively but powerfully edged its way into contemporary theoretical and critical discourse The four sections of this volume denote major areas where transcultural questions and problematics have come to the fore theories of culture and literature that have sought to account for the complexity of culture in a world increasingly characterized by globalization transnationalization and interdependence realities of individual and collective life worlds shaped by the ubiquity of phenomena and experiences relating to transnational connections and the blurring of cultural boundaries fictions in literature and other media that explore these realities negotiate the fuzzy edges of ethnic or national cultures and participate in the creation of transnational public spheres as well as transcultural imaginations and memories and finally pedagogy and didactics where earlier models of teaching other cultures are faced with the challenge of coming to terms with cultural complexity both in what is being taught and in the people it is taught to and where target cultures have become elusive The idea of locating culture and literature exclusively in the context of ethnicities or nations is rapidly losing plausibility throughout an English speaking world that has long since been multi rather than monolingual Exploring the prospects and contours of Transcultural English Studies thus reflects a set of common challenges and predicaments that in recent years have increasingly moved centre stage not only in the New Literatures in English but also in British and American studies Handbook of Ethnography Paul Atkinson, Sara Delamont, Amanda Coffey, John Lofland, Lyn Lofland, 2007-04-25 I wish the Handbook of Ethnography had been available to me as a fledgling ethnographer I would recommend it for any graduate student who contemplates a career in the field Likewise for experienced ethnographers who would like the equivalent of a world atlas to help pinpoint their own locations in the field Journal of Contemporary Ethnography No self respecting qualitative researcher should be without Paul Atkinson's handbook on ethnography This really is encyclopaedic in concept and scope Many big names in the field have contributed so this has to be the starting point for anyone looking to understand the field in substantive topic theoretical tradition and methodology SRA News Ethnography is one of the chief research methods in sociology anthropology and other cognate disciplines in the social sciences This Handbook provides an unparalleled critical guide to its principles and practice The volume is organized into three sections The first systematically locates ethnography firmly in its relevant historical and intellectual contexts The roots of

ethnography are pinpointed and the pattern of its development is demonstrated The second section examines the contribution of ethnography to major fields of substantive research The impact and strengths and weaknesses of ethnographic method are dealt with authoritatively and accessibly The third section moves on to examine key debates and issues in ethnography from the conduct of research through to contemporary arguments The result is a landmark work in the field which draws on the expertise of an internationally renowned group of interdisciplinary scholars The Handbook of Ethnography provides readers with a one stop critical guide to the past present and future of ethnography It will quickly establish itself as the ethnographer's bible

Women on the Verge Karen Kelsky, 2001-11-21 Explores issues of gender race and national identity in Japan by taking up for critical analysis an emergent national trend in which some urban Japanese women turn to the West through study abroad work abroad and romance with Westerners in order

Inventing the Muslim Cool Maruta Herding, 2014-03-15 In the current environment of a growing Muslim presence in Europe young Muslims have started to develop a subculture of their own The manifestations reach from religious rap and street wear with Islamic slogans to morally impeccable comedy This form of religiously permissible fun and of youth compatible worship is actively engaged in shaping the future of Islam in Europe and of Muslim non Muslims relations Based on a vast collection of youth cultural artefacts participant observations and in depth interviews in France Britain and Germany this book provides a vivid description of Islamic youth culture and explores the reasons why young people develop such a culture

Translocality, 2010-01-25 This volume discusses globalising processes from the perspective of the humanities and social sciences It focuses on the global south notably the Middle East Asia and Africa Densely researched case studies examine a variety of approaches for their potential to understand connecting processes on different scales The studies seek to overcome the main traps of the globalisation paradigm such as its occidental bias its notion of linear expansion its simplifying dichotomy between local and global and an often found lack of historical depth They elaborate the asymmetries mobilities opportunities and barriers involved in globalising processes Their new perspective on these processes is captured by the concept of translocality which aims at integrating a variety of theoretical and methodological approaches from different disciplines

Electronic Tribes Tyrone L. Adams, Stephen A. Smith, 2009-06-03 Whether people want to play games and download music engage in social networking and professional collaboration or view pornography and incite terror the Internet provides myriad opportunities for people who share common interests to find each other The contributors to this book argue that these self selected online groups are best understood as tribes with many of the same ramifications both positive and negative that tribalism has in the non cyber world In *Electronic Tribes* the authors of sixteen competitively selected essays provide an up to the minute look at the social uses and occasional abuses of online communication in the new media era They explore many current Internet subcultures including MySpace com craftster org massively multiplayer online role playing games MMORPGs such as World of Warcraft music downloading white supremacist and other counterculture groups and

Nigerian e mail scams Their research raises compelling questions and some remarkable answers about the real life social consequences of participating in electronic tribes Collectively the contributors to this book capture a profound shift in the way people connect as communities formed by geographical proximity are giving way to communities both online and offline formed around ideas **The SAGE Handbook of Qualitative Methods in Health Research** Ivy Bourgeault,Robert Dingwall,Ray de Vries,2010-08-19 The Sage Handbook of Qualitative Methods in Health Research is a comprehensive and authoritative source on qualitative research methods The Handbook compiles accessible yet vigorous academic contributions by respected academics from the fast growing field of qualitative methods in health research and consists of A series of case studies in the ways in which qualitative methods have contributed to the development of thinking in fields relevant to policy and practice in health care A section examining the main theoretical sources drawn on by qualitative researchers A section on specific techniques for the collection of data A section exploring issues relevant to the strategic place of qualitative research in health care environments The Sage Handbook of Qualitative Methods in Health Research is an invaluable source of reference for all students researchers and practitioners with a background in the health professions or health sciences

Vrindavan's Encounter with Modernity Samrat S. Kumar ,2019 Over the last decade traditional Indian temple towns have transformed into centres for urban lifestyles and tourist activities One of these is the historic temple town Vrindavan in North India on which this study focuses Exploring the multiple socio cultural realities present in the town the author engages with the narratives of the residents as they respond to the socio environmental changes against the backdrop of national and regional modernisation processes Here the imaginaries of a mythic Vrindavan with its pristine and sacred environment are evoked in narrations on contemporary modernity *Where is the Field?* Laura Hirvi,Hanna Snellman,2012-11-09 The book sheds light on the experiences of immigrants in different parts of the world and other insightful reflections on the art of carrying out fieldwork in the present day when the task of locating the field seems to present a particular challenge for researchers This book is of interest to experienced ethnographers working in the discipline of migration studies and also to scholars conducting ethnographic research in other fields *Fieldwork in Tourism* Michael C. Hall,2010-10-04 The inherent mobility of tourists and consequent relative ephemerality of contact between the visitor and the visited tourism phenomenon have specific characteristics that challenge the usual fieldwork practices of the social and physical sciences Such conditions create specific concerns for the tourism researcher in terms of their positionality relationality accessibility ethics reflexivity and methodological appropriateness *Fieldwork in Tourism* is the first book to focus on this extremely significant component of contemporary tourist research and provides hands on approaches to conducting tourism fieldwork in a range of settings exploring the methodological considerations and offering strategies to mitigate these The book also discusses how fieldwork affects researchers personally and what happens to field relationships Divided into five sections each with an introduction and a guide to further reading the chapters cover the context of fieldwork research relationships politics and power the

position of the researcher in the field research methods and processes including virtual fieldwork and the relationships between being a tourist and doing fieldwork The concluding chapter suggests that the link between tourism and fieldwork perhaps offers greater insights into understanding creative fieldwork than may be imagined This book incorporates a rich and diverse set of fieldwork experiences insights and reflections on conducting fieldwork in different settings the problems that emerge the solutions that were developed and the realities of being in the field Fieldwork in Tourism is an essential guide for Tourism higher level students academics and researchers embarking on research in this field **Trouillot**

Blame Christine Stewart, 2014-12-02 Papua New Guinea is one of the many former British Commonwealth colonies which maintain the criminalisation of the sexual activities of two groups despite the fact that the sex takes place between consenting adults in private sellers of sex and males who have sex with males The English common law system was imposed on the colonies with little regard for the social regulation and belief systems of the colonised and in most instances was retained and developed post Independence regardless of the infringements of human rights involved Now the HIV pandemic has thrown a spotlight not altogether welcome on the sexual activities of these two groups In Papua New Guinea a growing body of behavioural research has focused on such matters as individual sexual partnering condom use and awareness of HIV My work however has a different purpose I chose the terms in the title to highlight a nexus which I believe exists between the criminal law and negative attitudes of society At an international level the argument has been put that decriminalising sex work and sodomy will facilitate HIV epidemic management reducing the stigma and discrimination these groups encounter and making them easier to reach I undertook my research therefore with the aim of gaining deeper understanding of the effects the current situation of criminalisation might have on the social lives of these criminalised people today in the country generally and in Port Moresby the capital in particular and whether these effects might provide evidence to support the argument for law reform This is a rich and well researched study of the legal social and moral issues surrounding the criminalisation of two forms of consensual sex A very impressive piece of work it is extensively documented relies on a wide range of material and makes a clear and coherent argument about the place of law in producing identities and exclusions The attention to change over time and the complexity of the ways in which sexual behaviour is enacted and punished is a particular strength of the book Professor Sally Engle Merry Anthropology Law and Society New York University This book is an exceptional contribution to our knowledge of the nexus between the criminal law and negative attitudes of society and what effects criminalization has on the social lives of prostitutes and males who have sex with males and whether these effects might provide evidence to support the argument for law reform The author's experience of Papua New Guinea allows

her to comment in depth on such matters as the United Nations human rights approach to the HIV epidemic and their call to decriminalize all sexual acts between consenting adults She shows that criminal laws with the help of the normative discourse of religion and media underpin and legitimize high levels of stigma discrimination and abuse of prostitutes and males who have sex with males The quality of the writing and general presentation are exceptional Laura Zimmer Tamakoshi Truman State University retired *The Making of British Anthropology, 1813-1871* Efram Sera-Shriar, 2015-07-28 Victorian anthropology has been called an armchair practice distinct from the scientific discipline of the 20th century Sera Shriar argues that anthropology went through a process of innovation which built on observational study and that nineteenth century anthropology laid the foundations for the field based science of today **Centralizing Fieldwork** Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology **Gaming Culture(s) in India** Aditya Deshbandhu, 2020-05-13 This volume critically analyzes the multiple lives of the gamer in India It explores the everyday of the gaming life from the player's perspective not just to understand how the games are consumed but also to analyze how the gamer influences the products many virtual lives Using an intensive ethnographic approach and in depth interviews this volume situates the practice of gaming under a broader umbrella of digital leisure activities and foregrounds the proliferation of gaming as a new media form and cultural artifact critically questions the term gamer and the many debates surrounding the gamer tag to expand on how the gaming identity is constructed and expressed details participants gaming habits practices and contexts from a cultural perspective and analyzes the participants responses to emerging industry trends reflections on playing practices and their relationships to friends communities and networks in gaming spaces and examines the offline and online spaces of gaming as sites of contestation between developers of games and the players A holistic study covering one of the largest video game bases in the world this volume will be of great interest to scholars and researchers of cultural studies media and communication studies and science and technology studies as well as be of great appeal to the general reader
