the ways in which Latin American women have constructed themselves as modern subjects of the nation and made use of the ambiguous spaces created by modernization and national discourses The section starts firstly with a focus on the Southern Cone covering Chile and Argentina and then moves geographically northward to Colombia and Bolivia The second section Models and Genres consists of six chapters that examine how women writers engage with and critically re work existing literary discourses and paradigms Considering phenomena such as detective fiction fairy tales and classical mythological figures the chapters illustrate how these genres and models frequently coded as masculine are given new inflections both as a result of their deployment by women and as a result of their re working in a Latin American context **Heidegger on**

Omnibus I Douglas Wilson, G. Tyler Fischer, 2005

Natural Law and Justice Lloyd L. Weinreb, 1987 Human beings are a part of nature and apart from it The argument of Natural Law and Justice is that the philosophy of natural law and contemporary theories about the nature of justice are both efforts to make sense of the fundamental paradox of human experience individual freedom and responsibility in a causally determined universe Lloyd Weinreb restores the original understanding of natural law as a philosophy about the place of humankind in nature He traces the natural law tradition from its origins in Greek speculation through its classic Christian statement by Thomas Aquinas He goes on to show how the social contract theorists adapted the idea of natural law to provide for political obligation in civil society and how the idea was transformed in Kant's account of human freedom He brings the historical narrative down to the present with a discussion of the contemporary debate between natural law and legal positivism including particularly the natural law theories of Finnis, Richards and Dworkin Weinreb then adopts the approach of modern political philosophy to develop the idea of justice as a union of the distinct ideas of desert and entitlement He shows liberty and equality to be the political analogues of desert and entitlement and both pairs to be the normative equivalents of freedom and cause In this part of the book Weinreb considers the theories of justice of Rawls and Nozick as well as the communitarian theory of MacIntyre and Sandel The conclusion brings the debates about natural law and justice together as parallel efforts to understand the human condition This original contribution to legal philosophy will be especially appreciated by scholars, teachers and students in the fields of political philosophy, legal philosophy and the law generally
