Ettington, As an engineer and student of science I try to keep up with publications of the latest discoveries and paradigm shifts in science around the world I believe that there are several big problems with science today First is that much science is biased which might be because some scientists want to keep their point of view prominent and the others because many focuses of science are supported by biased funding This will be discussed in this book The other issue is that many scientists limit their thinking to only support age old paradigms and refuse to accept changes to their theories or throw out evidence because it doesn't conform their current beliefs In this book we will cover many issues such as the belief among many cosmologists that the Big Bang never happened We will also look at ideas we thought settled but which have lots of contrary evidence and anecdotal counter stories such as time travel and dimensional crossings After you read this book you may question much of what is commonly accepted by scientists in the world today      Translations on North Vietnam ,

Great Britain and the industry was one of the most important and powerful in British history. It dominated the lives of generations of individuals, their families and communities, and its legacy is still with us today. Many of us have a coalmining ancestor. Yet family historians often have problems in researching their mining forebears. Locating the relevant records, finding the sites of the pits and understanding the work involved and its historical background can be perplexing. That is why Brian Elliott's concise, authoritative and practical handbook will be so useful for it guides researchers through these obstacles and opens up the broad range of sources they can go to in order to get a vivid insight into the lives and experiences of coalminers in the past. His overview of the coalmining history and the case studies and research tips he provides will make his book rewarding reading for anyone looking for a general introduction to this major aspect of Britain's industrial heritage. His directory of regional and national sources and his commentary on them will make this guide an essential tool for family historians searching for an ancestor who worked in coalmining underground on the pit top or just lived in a mining community. In the old industrial regions of the Ruhr District, Germany, Upper Silesia, Poland and the Ostrava Region, Czech Republic, coal as well as iron and steel have been the economic basis for many decades. In the Ruhr District, important changes already started at the end of the 1950s. In Upper Silesia and in the Ostrava Region, however, these processes started at the end of the 1980s, together with the transformation of the economic and social system in these countries. Because of high unemployment, steps are taken to modernize the economy and to retrain employees. All three regions cannot develop out of their own strength, but there are programmes in order to support this process.      **LOST CITIES & ANCIENT MYSTERIES OF THE SOUTHWEST** David Hatcher Childress, 2011-03-22. Popular. Lost Cities author David Hatcher Childress takes to the road again in search of lost cities and ancient mysteries. This time he is off to the American Southwest, traversing the region's deserts, mountains and forests, investigating archeological mysteries and the unexplained. Join David as he starts in northern Mexico and searches for the lost mines of the Aztecs. He continues north to west Texas, delving into the mysteries of Big Bend, including mysterious Phoenician tablets discovered there and the strange lights of Marfa. He continues northward into New Mexico where he stumbles upon a hollow mountain with a billion dollars of gold bars hidden deep inside it. In Arizona, he investigates tales of Egyptian catacombs in the Grand Canyon, cruises along the Devil's Highway and tackles the century-old mystery of the Superstition Mountains and the Lost Dutchman mine. In Nevada and California, Childress checks out the rumors of mummified giants and weird tunnels in Death Valley, plus he searches the Mohave Desert for the mysterious remains of ancient dwellers alongside lakes that supposedly dried up tens of thousands of years ago. It's a full tilt blast down the back roads of the Southwest in search of the weird and wondrous mysteries of the past.      **Films that Work** Vinzenz Hediger, Patrick Vonderau, 2009. Industriële films worden gezien als een

apart filmgenre van de twintigste eeuw Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen en niet zo zeer aan die van de filmmakers In de hoogtijdagen werkten er duizenden mensen aan deze industriële films Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT T Daarnaast hebben belangrijke regisseurs zoals Buster Keaton John Grierson en Alain Resnais aan deze films meegewerkt Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours Films that Work is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht
