## Lab #10: Cellular Respiration Lab

### Rate of Respiration - Virtual Lab

<http://amrita-clabs.edu.in/?sub=79&brch=17&sim=204&cnt=4>

This simulation allows you to change three different variables: type of seeds, number of seeds, and temperature. When you start the experiment, you can alter the variables and it will run for two hours. The water level (starting at 2ml) will rise to reflect the amount of  $\text{CO}_2$  produced by the seeds in the flask.

**Question 1: How does the number of seeds in the chamber affect the rate of respiration?**

CLAIM:

The seeds will affect it by taking up  $\text{O}_2$

EVIDENCE:

Number of Seeds	10	20	30	40	50
$\text{CO}_2$ Level	0.9	1.6	2.4	3.0	3.5

REASONING: (Summarize trends in the data and provide an explanation for those trends).

I have to accepted my claim because the more seed the lower the  $\text{O}_2$  and higher the  $\text{CO}_2$ .

**Question 2: How does the temperature of the chamber affect the rate of respiration?**

CLAIM:

The temp will affect the seed

EVIDENCE:

Temperature	5	15	25	35	
$\text{CO}_2$ Level	0.4	0.9	1.5	2.1

**Cracking the AP Biology Exam, 2014 Edition** Kim Magloire, 2013. Featuring a comprehensive biology test topic review and an overview of the subject matter changes made to the 2013 AP Biology Exam, this revised edition provides students with test strategies, review questions, and two full-length practice tests. Original **Learning and Understanding** National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Programs for Advanced Study of Mathematics and Science in American High Schools, 2002-09-06. This book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the Advanced Placement and the

International Baccalaureate programs and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system, and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.
