

AP Biology Research Paper

Objective: To compose a 5-7 page research article based on four to five scientific studies found in scientific journals. You will use only one **review** article as your source, and the rest will be **primary** articles found in your reviews references.

Points possible: 100, **Due:** Friday June 8, Period 1, 9:11am

Late papers and benchmarks will be deducted 30% per 24 hours late regardless of reason. Papers will gladly be accepted prior to due date.

A review article is a summarized version of a primary study. Most review articles are titled "review"

This is what every **primary article** contains:

- Title and Authors
- Abstract (a brief description of the study)
- Introduction of the topic (Opening, that "hooks" readers, may include a general problem statement)
- Research Questions (clarifying all the variables that would be studied)
- Research Hypotheses (if they have any)
- Significance of your Study (So what? How is the study important?)
- Literature review (Background material)
- Research Design and Methods (description of subjects, participants, setting/sites, type of study (qualitative, quantitative, mixed), instruments that will be used to measure the variables, statistical procedures that they would use or have used if you have completed the study, details about how you actually implemented your study etc)
- Results (Data analysis, detailed explanation of what they found out in with analysis provided.)
- Discussion (What do the results mean? how are your results impacting the field or practice, future research ideas)
- Conclusions (summarizing the entire study, a kind of closure)
- References (all the articles that have been cited within the paper should be written in APA style)
- Link to [APA Style Crib Sheet](#) (these links are active on web version of guidelines)
- [APA Style Guidelines, download here](#).

Your finished product will contain the following sections:

- Title
- Abstract (including significance of studies)
- Summary of Research and Hypothesis
- Designs and Methods
- Results
- Discussion/Conclusion
- References
