

Learning objectives:

- Write an effective, testable hypothesis.
- To experimentally determine the relationship between the mass of an object and how far it slides from the bottom of a ramp.
- To experimentally determine the relationship between the angle of a ramp and how far an object slides from the bottom of a ramp.
- To confirm the experimentally determined relationship with a theoretical derivation.

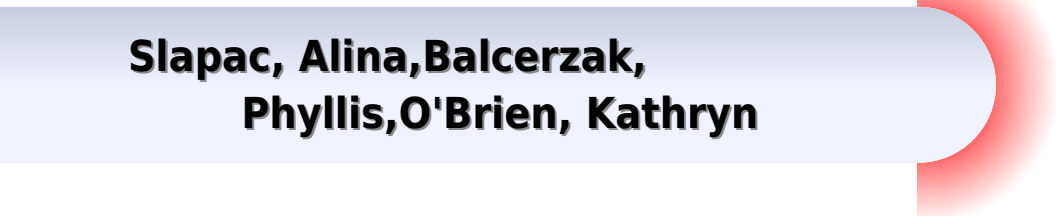

Directions:

1. Go to the PhET simulation Ramp: Forces and Motion and click "Run Now". You will place a crate at the top of a ramp and let it slide down. The simulation is at <http://phet.colorado.edu/en/simulation/ramp-forces-and-motion>. Set $\mu_k=0.5$, $\mu_s=0.3$, $g=9.8\text{m/s}^2$.
2. Explore the **Ramp: Forces and Motion** simulation with your partner. As you explore, talk about what you find with your partner.
3. Click "**Show**" on the **Free Body Diagram**. Push the **filing cabinet** back and forth while looking at the free body diagram. What makes the arrows change in length and direction?
4. What changes when you switch between ice and wood as you push the Filing Cabinet back and forth?
5. How does the **angle** of the ramp change the length and direction of the arrows in the **Free Body Diagram**?

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research Slapac, Alina, Balcerzak, Phyllis, O'Brien, Kathryn, 2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID-19 pandemic that has been affecting all sectors, including education. There were questions surrounding the effectiveness of online trainings for teachers, online teaching practices, the motivation and engagement of students, and the quality of learning and education in these times. Action research emerged to address these concerns, being a systematic process of inquiry using reflection within a cyclical model of planning, acting, implementing, evaluating, and continuous reflection. This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences. Using collaboration, social advocacy, and action research, there is the opportunity to advance teaching for students, families, and communities without a physical context involved. The *Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research* explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms. This book showcases educational professionals' action research for solutions in advancing teaching and learning, the practical benefits of action research, recommendations for improving online teaching and learning, and a focus on professional growth as well as social justice advocacy. It highlights important topics including student learning, teacher collaboration, authentic learning, advocacy, and action research in both K-12 and higher education settings. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in how action

research is improving and advancing knowledge on the best teaching practices for online education
