war trauma and then how the followers of Sigmund Freud showed that shell shock symptoms were as likely to be expressions of fears and conflicts internal to the patients as the effects of exploding shells. The line drawn by the Freudian critique of the medical neurological model would resurface in debates leading to PTSD's inclusion in the DSM in 1980 and on going deliberations over the definition and meaning of Traumatic Brain Injury. In core chapters Lembcke shows the influence of film theater television and news coverage on public and professional thinking about war trauma. The inglorious nature of recent wars from Vietnam through Iraq and Afghanistan leaves Americans searching for meaning in those conflicts and finding it in loss and sacrifice. Lembcke warns that the image of damaged war veterans is working metaphorically in these dangerous times to construct a national self image of defeat and damage that needs to be avenged. It is a dangerous end of empire narrative that needs to be engaged he says lest its dangers reach fruition in more war. The insights found in this book make it an invaluable resource for scholars of sociology medical sociology psychology military studies gender studies and history of psychiatry and a riveting read for anyone interested in the subjects it treats. *America Pathways to the Present*, 1995
