Environmental Anthropology Helen Kopnina, Eleanor Shoreman-Ouimet, 2013-07-18 This volume presents new theoretical approaches methodologies subject pools and topics in the field of environmental anthropology Environmental anthropologists are increasingly focusing on self reflection not just on themselves and their impacts on environmental research but also on the reflexive qualities of their subjects and the extent to which these individuals are questioning their own environmental behavior Here contributors confront the very notion of natural resources in granting non human species their subjectivity and arguing for deeper understanding of nature and wilderness beyond the label of ecosystem services By engaging in interdisciplinary efforts these anthropologists present new ways for their colleagues subjects peers and communities to understand the causes of and alternatives to environmental destruction This book demonstrates that environmental anthropology has moved beyond the construction of rural small group theory entering into a mode of solution based methodologies and interdisciplinary theories for understanding human environmental interactions It is focused on post

rural existence health and environmental risk assessment on the realm of alternative actions and emphasizes the necessary steps towards preventing environmental crisis **Dreams, Revelations, and Manifestations** Phyllis Baker, 2022-06-26

International Studies Scott Straus,Barry Driscoll,2018-09-10 The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems In International Studies Global Forces Interactions and Tensions award winning scholars Scott Straus and Barry Driscoll give students a clear framework that pinpoints how key factors forces interactions and tensions contribute to world events with both global and local consequences The authors first show students how to look for common patterns in global issues by introducing four world shaping forces global markets shifting centers of power information and communications technologies and global governance

They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges. The framework enables students to ask and answer for themselves: Who is interacting? Where did such interactions develop? What policies or institutions govern them? Why are they getting certain global and local reactions? Students then apply the framework to the global problems that matter most to them: human rights abuses, economic inequality, terrorism, forced migration, pandemics, and global health responses, climate change, food security, and more. International Studies raises the bar for the Introduction to IS course, moving beyond interdisciplinary and into the realm of critical analysis to increase student relevancy and motivation.
