Anti Ugly Excursions In English Architecture And Design Gavin Stamp:

Anti-Ugly Gavin Stamp, 2013-11-07 Since 2004 Gavin Stamp one of Britain's most eminent and readable architectural historians has written a monthly column for Apollo the esteemed architecture and fine art magazine The subject is simply whatever in design or architecture happens to take his fancy It might be the splendid reopening of the magnificent Midland Grand Hotel at St Pancras Station or the dilapidation of a little known church in Eastbourne the much lamented demise of the original Routemaster bus or the colossal majesty of the airship sheds that housed the R 101 But while these pieces display a wonderful range and variety they are unified by Stamp's wider quest to explore define and champion the very Englishness of English architecture and design When fine examples are preserved and restored he celebrates when they fall victim to philistine neglect or worse demolition he mourns And when the elegant is overshadowed by the merely modish he deplores In *Anti Ugly* Stamp has selected the best of these excursions producing a compulsively readable collection that builds into an eloquent learned trenchant and often indignant portrait of our national design heritage

Ugliness Gretchen E. Henderson, 2015-11-15 Ugly as sin the ugly duckling or maybe you fell out of the ugly tree Let's face it we've all used the word ugly to describe someone we've seen hopefully just in our private thoughts but have we ever considered how slippery the term can be indicating anything from the slightly unsightly to the downright revolting What really lurks behind this most favored insult In this actually beautiful book Gretchen E Henderson casts an unfazed gaze at ugliness tracing its long standing grasp on our cultural imagination and highlighting all the peculiar ways it has attracted us to its repulsion Henderson explores the ways we have perceived ugliness throughout history from ancient Roman feasts to medieval grotesque gargoyles from Mary Shelley's *Frankenstein* to the Nazi Exhibition of Degenerate Art Covering literature art music and even the cutest possible incarnation of the term Uglydolls she reveals how ugliness has long posed a challenge to aesthetics and taste She moves beyond the traditional philosophic argument that simply places ugliness in opposition to beauty in order to dismantle just what we mean when we say ugly Following ugly things wherever they have trod she traverses continents and centuries to delineate the changing map of ugliness and the profound effects it has had on the public imagination littering her path with one fascinating tidbit after another Lovingly illustrated with the foulest images from art history and culture *Ugliness* offers an oddly refreshing perspective going past the surface to ask what ugly truly is even as its meaning continues to shift

No more giants Jessica Kelly, 2023-01-24 Architecture is more than buildings and architects It also involves photographers writers advertisers and broadcasters as well as the people who finance and live in the buildings Using the career of the critic J M Richards as a lens this book takes a new perspective on modern architecture Richards served as editor of *The Architectural Review* from 1937 to 1971 during which time he consistently argued that modernism was integrally linked to vernacular architecture not through style but through the principle of being an anonymous expression of a time and public spirit Exploring the continuities in Richards's ideas throughout his career

disrupts the existing canon of architectural history which has focused on abrupt changes linked to individual pioneers encouraging us to think again about who is studied in architectural history and how they are researched Crash Bang Wallop Iain Martin, 2016-09-08 Published to mark the 30th anniversary of the financial revolution known as Big Bang Crash Bang Wallop will tell the gripping story of how the changes introduced in the 1980s in the City of London transformed our world Attitudes to money and the way we measure value and status were completely reshaped by Big Bang and it had an extraordinary impact on politics on style on technology on the class system on questions of public ownership and on the geography of London Perhaps more than anything Big Bang revolutionised the international markets as the capital became a testing ground for financial globalisation with huge repercussions for the global economy The definitive insider's account of this critically important moment in modern history Crash Bang Wallop will also explore what's next for global finance as it gets ready to undergo yet another revolution Iain Martin tells it brilliantly mixing fury inducing narrative with an acute eye for the broader conclusion Observer Peace and Power in Cold War Britain Christopher R. Hill, 2018-08-09 Peace and Power in Cold War Britain explores the ban the bomb and anti Vietnam War movements from the perspective of media history focusing in particular on the relationship between radicalism and the rise of television In doing so it addresses two questions both of which seem to recur with each major breakthrough in communications technology what do advances in communications media mean for democratic participation in politics and how do distinctive types of media condition the very nature of that participation itself In answering these the book views the ban the bomb and anti Vietnam War movements in relation to communication power and media discourse It highlights how these movements intersected with parts of public life that were being transformed by television themselves shaping struggles for social change among activists and public intellectuals on the streets in the Labour Party and in the law courts The significance of this relationship between media and movements was complex and wide ranging Christopher R Hill demonstrates that it contributed to the enrichment of democracy in Cold War Britain with radicals serving to innovate and pioneer creative forms of political expression from both in and outside of media organisations However the movements increasingly succumbed to news coverage and values that revolved around human interest and violence feeding into the revolutionary spectacle of 1968 and the turn towards identity politics Making Dystopia James Stevens Curl, 2018-08-23 In Making Dystopia distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so

called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue

Voices of Guinness Tim Strangleman, 2019-05-02 Imagine a workplace where workers enjoyed a well paid job for life one where they could start their day with a pint of stout and a smoke and enjoy free meals in silver service canteens and restaurants During their breaks they could explore acres of parkland planted with hundreds of trees and thousands of shrubs Imagine after work a place where employees could play more than thirty sports or join one of the theater groups or dozens of other clubs Imagine a place where at the end of a working life you could enjoy a company pension from a scheme to which you had never contributed a penny Imagine working in buildings designed by an internationally renowned architect whose brief was to create a building that would last a century or two This is no fantasy or utopian vision of work but a description of the working conditions enjoyed by employees at the Guinness brewery established at Park Royal in West London in the mid 1930s In this book Tim Strangleman tells the story of the Guinness brewery at Park Royal showing how the history of one plant tells us a much wider story about changing attitudes and understandings about work and the organization in the twentieth and early twenty first centuries Drawing on extensive oral history interviews with staff and management as well as a wealth of archival and photographic sources the book shows how progressive ideas of workplace citizenship came into conflict with the pressure to adapt to new expectations about work and its organization Strangleman illustrates how these changes were experienced by those on the shop floor from the 1960s through to the final closure of the plant in 2005 This book asks striking and important questions about employment and the attachment workers have to their jobs using the story of one of the UK and Ireland s most beloved brands Guinness

The Everyday Life of Memorials Andrew M. Shanken, 2022-10-04 A timely study erudite and exciting about the ordinary and oftentimes unseen lives of memorials Memorials are commonly studied as part of the commemorative infrastructure of modern society Just as often they are understood as sites of political contestation where people battle over the meaning of events But most of the time they are neither Instead they take their rest as ordinary objects part of the street furniture of urban life Most memorials are turned on only on special days such as Memorial Day or at heated moments as in August 2017 when the Robert E Lee monument in Charlottesville was overtaken by a political maelstrom The rest of the time they are turned off This book is

about the everyday life of memorials It explores their relationship to the pulses of daily life their meaning within this quotidian context and their place within the development of modern cities Through Andrew Shanken s close historical readings of memorials both well known and obscure two distinct strands of scholarship are thus brought together the study of the everyday and memory studies From the introduction of modern memorials in the wake of the French Revolution through the recent destruction of Confederate monuments memorials have oscillated between the everyday and the not everyday In fact memorials have been implicated in the very structure of these categories The Everyday Life of Memorials explores how memorials end up where they are grow invisible fight with traffic get moved are assembled into memorial zones and are drawn anew into commemorations and political maelstroms that their original sponsors never could have imagined Finally exploring how people behave at memorials and what memorials ask of people reveals just how strange the commemorative infrastructure of modernity is

The City in the City Amy Thomas, 2023-12-26 An exploration of the dramatic transformation of London s financial district after 1945 viewed at four spatial scales city street facade interior In The City in the City Amy Thomas offers the first in depth architectural and urban history of London s financial district the City of London from the period of rebuilding after World War II to the explosive climax of financial deregulation in the 1980s and its long aftermath Thomas examines abstract financial ideas political ideology and invisible markets as concrete realities working on four spatial scales city street facade and interior the book explores the grand plans hidden alleys neo Georgian elevations and sweaty dealing floors that have made the financial center work Moving from politics to sociology institutions to bodies development plans to office desks Thomas unravels the rich entanglements between the structure of the UK s financial system and the structure of the environment in which it operates Despite its physical and political centrality this period of the City s architectural history occupies an academic lacuna Longstanding prejudices about developer led architecture and the real estate industry have obscured the postwar City s relevance The book shows how as currents of local government reform nation building and globalization swept across Britain the City became an ideological battleground for debates between politicians and financial institutions real estate developers and architects preservationists and so called proactive planners throughout the latter half of the century The City of London is a place steeped in rich cultural and architectural heritage of immense national significance yet it is also a highly privileged citadel at the core of global financial networks The City in the City is both a critique and a celebration of this unique and complex place

La otra arquitectura moderna David Rivera Gámez, 2019-02-15 Este libro trata de los estilos y las tendencias de la primera mitad del siglo XX que están ausentes o son marginales en las historias de la arquitectura moderna pero que fueron importantes e influyentes en la época en la que nacieron En el texto se analizan los movimientos expresionistas y simbolistas tanto como los estilos puros modernos el Futurismo el Art Deco el Novecento la arquitectura metafísica el monumentalismo industrial babilónico y los diversos tipos de clasicismo Con ello se pretende restituir toda su riqueza y complejidad a la historia de la arquitectura moderna y reconocer a una serie de grandes arquitectos Michel de Klerk Edwin Lutyens Raymond Hood o Josep Plech entre ellos la importancia de su contribución Dado que a diferencia de la historia del Movimiento Moderno la de los otros estilos de la primera mitad del siglo XX forma parte inseparable de la cultura de ciudades concretas este libro puede verse también como una exploración arquitectónica de los contextos urbanos modernos aun cuando su enfoque se circunscribe a las grandes capitales europeas y los movimientos estadounidenses A lo largo del texto comprobamos cómo París Londres Berlín Praga Moscú Milán Roma Viena Ámsterdam Liubliana o Nueva York proporcionaron un sentido de identidad específico a diversos estilos y movimientos arquitectónicos que proponían transformaciones en clave moderna de las distintas tradiciones locales En resumen el libro ofrece una interpretación alternativa de la historia de la arquitectura de la primera mitad del siglo XX y un recorrido amplio aunque inevitablemente selectivo por la otra arquitectura moderna El prólogo es obra de Paul Goldberger antiguo crítico de arquitectura de The New York Times y The New Yorker uno de cuyos libros está traducido al español Por qué importa la arquitectura Ivorypress 2012

Lost Victorian Britain Gavin Stamp, 2010 Both a remarkable photographic record of a vanished landscape of 19th century architecture and an angry polemic against the cavalier destruction of hundreds of grand buildings this is the latest record of magnificent buildings from previous centuries that for a variety of reasons but above all cavalier demolition by 20th century planners devoted to the cause of modernism are now no more and exist only in heartbreakingly poignant photographs This latest chronicles an astonishing and depressing array of the finest Victorian architecture all sacrificed to the wrecking ball from the Euston Arch to Preston Town Hall from a great country house like Trentham in Staffordshire to a fine Victorian church like St Jude's in London's Red Lion Square Here are public baths railway termini and hotels town houses factories banks law courts all buildings that if threatened today would soon see calls for restoration But it's too late photographs are all we have left Gavin Stamp's indignant and scholarly text looks back at the

circumstances of their loss and analyzes the 20th century mind set that could hold so many magnificent buildings in such little regard **Excursions into architecture** ,19?? **An Activist Scholar** Paul Mellon Centre for Studies in British Art,Joshua Mardell,2023
