**Antibiotic Policies Controlling Hospital Acquired Infection:**

    **Antibiotic Policies** Ian M. Gould,Jos W.M. van der Meer,2011-09-25 The first book was on Theory and Practice of antibiotic stewardship in its broadest sense the how to do it and the do s and don ts The second on Controlling resistance was very much on the relationships between use and resistance and beginning to home in on the hospital as the main generator of resistance but mainly looking at it from a disease clinical perspective The last 3 chapters on MRSA ended where the 3rd book will take off Controlling HAI will concentrate on specific MDR organisms highlighting their roles in the current pandemic of HAI and emphasizing that the big issue is not so much infection control but antibiotic control in the same way that antibiotic over reliance over use has caused the problem in the first place Up till now the emphasis for controlling MRSA C diff and all the other MDROs has very much been on IC which clearly isn t working This book will gather all the evidence for the increasingly popular view that much more must be done in the area of antibiotic policies stewardship especially when we are in danger of a post antibiotic era due to a real shortage of new agents in the pipeline *Infection Prevention and Control in Healthcare, Part II: Clinical Management of Infections, An Issue of Infectious Disease Clinics of North America, E-Book* Keith S.
