"Better in France?" Frédéric Ogée, 2005 This book discusses the way ideas and forms traveled between Britain and France during the eighteenth century and the extent to which the circulation of ideas between the two countries could be difficult The volume shows that this difficulty because it was acknowledged and often thematized contributed to an increased awareness of what was really at stake in the very concept of Enlightenment The examination of points of contact between the two cultures contacts that became very much the fashion in the course of the eighteenth century helps us understand how apparently common concepts and concerns fared differently from one country to the next while being enriched by those contacts The conversation of aesthetic theories and artistic forms of expression between the two countries sheds interesting light on the overall confrontation of conflicting theories of power and control that expressed themselves throughout the period of complete political redistribution The ways myths and stories forms and theories traveled and changed currency gives us a clearer

political grasp on the whole history of exchanges as writers and artists encouraged or irritated by the new myth of Progress kept putting forward nothing else but models and strategies of public and private political economy Frederic Ogee is Professor of English Literature at the University of Paris 7 Denis Diderot Making and Rethinking the Renaissance Giancarlo Abbamonte, Stephen Harrison, 2019-06-04 The purpose of this volume is to investigate the crucial role played by the return of knowledge of Greek in the transformation of European culture both through the translation of texts and through the direct study of the language It aims to collect and organize in one database all the digitalised versions of the first editions of Greek grammars lexica and school texts available in Europe in the 14th and 15th centuries between two crucial dates the start of Chrysoloras's teaching in Florence c 1397 and the end of the activity of Aldo Manuzio and Andrea Asolano in Venice c 1529 This is the first step in a major investigation into the knowledge of Greek and its dissemination in Western Europe the selection of the texts and the first milestones in teaching methods were put together in that period through the work of scholars like Chrysoloras Guarino and many others A remarkable role was played also by the men involved in the Council of Ferrara 1438-39 where there was a large circulation of Greek books and ideas About ten years later Giovanni Tortelli together with Pope Nicholas V took the first steps in founding the Vatican Library Research into the return of the knowledge of Greek to Western Europe has suffered for a long time from the lack of intersection of skills and fields of research to fully understand this phenomenon one has to go back a very long way through the tradition of the texts and their reception in contexts as different as the Middle Ages and the beginning of Renaissance humanism However over the past thirty years scholars have demonstrated the crucial role played by the return of knowledge of Greek in the transformation of European culture both through the translation of texts and through the direct study of the language In addition the actual translations from Greek into Latin remain poorly studied and a clear understanding of the intellectual and cultural contexts that produced them is lacking In the Middle Ages the knowledge of Greek was limited to isolated areas that had no reciprocal links As had happened to many Latin authors all Greek literature was rather neglected perhaps because a number of philosophical texts had already been available in translation from the seventh century AD or because of a sense of mistrust due to their ethnic and religious differences Between the 12th and 14th century AD a change is perceptible the sharp decrease in Greek texts and knowledge in the South of Italy once a reference point for this kind of study was perhaps an important reason prompting Italian humanists to go and study Greek in Constantinople Over the past thirty years it has become evident to scholars that humanism through the re-appreciation of classical antiquity created a bridge to the modern era which also includes the Middle Ages The criticism by the humanists of medieval authors did not prevent them from using a number of tools that the Middle Ages had developed or synthesized glossaries epitomes dictionaries encyclopaedias translations commentaries At present one thing that is missing however is a systematic study of the tools used for the study of Greek between the 15th and 16th century this is truly important because in the following centuries Greek culture provided the basis of European thought

in all the most important fields of knowledge This volume seeks to supply that gap **The academy** ,1894 *Critique of Psychoanalytic Reason* Dany Nobus,2022-04-27 The highly arcane wisdom produced by the French psychoanalyst Jacques Lacan is either endlessly regurgitated and recited as holy writ by his numerous acolytes or radically dismissed as unpalatable nonsense by his equally countless detractors Contrary to these common strictly antagonistic yet uniformly uncritical practices this book offers a meticulous critique of some key theoretical and clinical aspects of Lacan s expansive oeuvre testing their consistency examining their implications and investigating their significance In nine interrelated chapters the book highlights both the flaws and the strengths of Lacan s ideas in areas of investigation that are as crucial as they are contentious within as well as outside psychoanalysis Drawing on a vast range of source materials including many unpublished archival documents it teases out controversial issues such as money organisational failure and lighthearted gay thinking and it relies on the highest standards of scholarly excellence to develop its arguments At the same time the book does not presuppose any prior knowledge of Lacanian psychoanalysis on the part of the reader but allows its readership to indulge in the joys of in depth critical analysis trans disciplinary creative thinking and persistent questioning This book will appeal to researchers and students alike in psychoanalytic studies and philosophy as well as all those interested in French theory and the history of ideas **Academy, with which are Incorporated Literature and the English Review** ,1893

Ronsard and Du Bartas in Early Modern Europe Anne-Pascale Pouey-Mounou,Paul J. Smith,2020-10-26 The sixteenth century French poets Pierre de Ronsard and Guillaume Du Bartas enjoyed a wide immediate and long lasting but varied and mixed reception throughout early modern Europe Ronsard and Du Bartas in Early Modern Europe is the first book length volume to explore the transnational reception histories of both poets in conjunction with each other It takes into account the great variety of their readerships including translators imitating poets poetical theorists illustrators and painters both male and female Marie de Gournay Anne Bradstreet some of them illustrious Tasso King James VI and I of Scotland and England Opitz others less known even obscure but worth to be saved from oblivion such as the French Marc Antoine Chalon the English Mary Roper and the Dutch poet Philibert van Borsselen This volume offers a fascinating insight into the different reception modes in Europe and their underlying political religious and literary identities Contributors include Peter Auger Denis Bja Karel Bostoen Philippe Chom ty Paola Cosentino Violaine Giacomotto Charra Alisa van de Haar P draic Lamb Anne Pascale Pouey Mounou Elisabeth Rothmund Paul J Smith and Caroline Trotot *Constructions of Greek Past* Hero Hokwerda,2021-11-22 In May 1999 a second conference of Hellenists of all periods and subject areas from the Dutch speaking countries was organized in Groningen The theme of this second conference was Constructions of Greek Past Identity and Historical Consciousness from Antiquity to the Present The conference theme was described as follows When seeking to establish its own identity a culture country people nation readily resorts to its own history which it uses either as an example or as something to react against In recent years there has been a growing awareness that this process often

reveals more about a culture in the present day than the historical era to which it harks back its own identity and thus its own history are constructed in this way The constructional approach is usually applied to the birth of new nation states and the development of their national ideologies particularly in the nineteenth century But it can be applied more broadly too Greek culture is an excellent subject area for studying this phenomenon even further back in history precisely because its history is so long and included several Golden Ages to which later periods could and can hark back Greek culture still presents itself as a product of Ancient Greek and or Byzantine culture However the problem of continuity in Greek culture has frequently manifested itself particularly during periods of radical political ideological or demographic change The Homeric influence on the Mycenaean world is therefore also an aspect of this phenomenon The Homeric world served as an example for later periods as did the Attic period for the Greeks in the Hellenistic Roman age The tensions between the Hellenistic and Roman character of the Greek world had a strong influence on the shaping of the Greek identity during late Antiquity and the Middle Ages Those tensions still exist today ellenism s ellenik tita v romiosyni The theme was designed to bring together Hellenists of all periods and disciplines literature language history archaeology ecclesiastical history sociology etc relating to the Greek world The colloquium sessions were held in Dutch but the papers are published in English two in French

L'Antisémitisme Éclairé Ilana Zinguer, Sam Bloom, 2021-10-11 This volume principally deals with perceptions on Jews dating from the beginnings of their emancipation to the Dreyfus Affair The title in French and the original title of the colloquium in Hebrew Enlightened Antisemitism not only reflects the overall anti religious anti Christian and hence by necessity anti Jewish sentiments of an Enlightenment figure such as Voltaire but also refers to those who justified either their philosemitism or antisemitism with erudition Johann David Michaelis Antoine Gu n e Charles Maurras etc With France as its focal point the volume also contains essays that treat various perceptions of Jews during the same period in England Germany and Italy Interdisciplinary in nature this collection of essays treats the Jewish question from historical literary and sociological angles

Melodramatic Voices: Understanding Music Drama Sarah Hibberd, 2016-04-22 The genre of melodrame grand spectacle that emerged in the boulevard theatres of Paris in the 1790s and which was quickly exported abroad expressed the moral struggle between good and evil through a drama of heightened emotions Physical gesture mise en sc ne and music were as important in communicating meaning and passion as spoken dialogue The premise of this volume is the idea that the melodramatic aesthetic is central to our understanding of nineteenth century music drama broadly defined as spoken plays with music operas and other hybrid genres that combine music with text and or image This relationship is examined closely and its evolution in the twentieth century in selected operas musicals and films is understood as an extension of this nineteenth century aesthetic The book therefore develops our understanding of opera in the context of

melodrama's broader influence on musical culture during the nineteenth and twentieth centuries This book will appeal to those interested in film studies drama theatre and modern languages as well as music and opera

Philosophy and Tragedy Simon Sparks, Miguel de Beistegui, 2005-08-04 From Plato's Republic and Aristotle's Poetics to Nietzsche's The Birth of Tragedy the theme of tragedy has been subject to radically conflicting philosophical interpretations Despite being at the heart of philosophical debate from Ancient Greece to the Nineteenth Century however tragedy has yet to receive proper treatment as a philosophical tradition in its own right Philosophy and Tragedy is a compelling contribution to that oversight and the first book to address the topic in a major way Eleven new essays by internationally renowned philosophers clearly show how time and again major thinkers have returned to tragedy in many of their key works Philosophy and Tragedy asks why it is that thinkers as far apart as Hegel and Benjamin should make tragedy such an important theme in their work and why after Kant an important strand of philosophy should present itself tragically From Heidegger's reading of Sophocles Antigone to Nietzsche and Benjamin's book-length studies of tragedy Philosophy and Tragedy presents an outstanding and original study of this preoccupation The five sections are organised clearly around five major philosophers Hegel Holderlin Nietzsche Heidegger and Benjamin

Troubled Legacies Michel Feith, Claudine Raynaud, 2015-09-18 What is being passed on The questions of heritage and inheritance are crucial to American minority literatures Some inheritances are claimed some are imposed and become stifling others still are impossible like the memories of oppression or alienation Heritage is not only patrimony however it is also a process in a state of constant reconfiguration The body its semiotics its genealogy its pressure points figures prominently as inevitable referent for the minority racial ethnic subject the performance and the writing of difference This collection of essays analyzes contemporary novels from major African American writers such as Gayl Jones Phyllis Alesia Perry Percival Everett John Edgar Wideman and Colson Whitehead and ethnic American novelists like Jeffrey Eugenides Philip Roth Gish Jen and Sergio Troncoso It also includes the study of a painting by African American artist Robert Colescott The first section of the book examines the inscription of African American writers' relation to the nation's past the trauma of slavery the burden of foundational discourses or the legacy of the classical philosophical canon The second part of the text is an assessment of the postmodern aesthetics of contemporary black fiction in the construction of history unveiling the modalities of the palimpsest fragmentation intermediality mises en abyme in a complex grammar of haunting and denial Gathering essays on Greek American Jewish American Chinese American and Mexican American fiction the final section delineates new conceptions of ethnicity based on fluidity hybridity and performativity Cross ethnic experimentations in super diversity according to which identities become optional an array of choices rather than forced belonging seem to be pointing the way to the next stage that of a post racial post ethnic society Yet the conjugated strictures of race and class still limit these choices to a significant degree and the works discussed in this volume often playfully or sarcastically question the validity of the post They ultimately ask who shall inherit America
