 Henckaerts,Louise Doswald-Beck,2005 In 1996 the International Committee of the Red Cross alongside a range of renowned
 experts embarked upon a major international study into current state practice in international humanitarian law in order to
 identify customary law in this area This book is the result of that study a comprehensive analysis of the customary rules of
 international humanitarian law applicable in international and non international armed conflicts Given that important treaties
 in this area have not yet been universally ratified this is a publication of major importance carried out at the express request
 of the international community In so doing this study identifies the common core of international humanitarian law binding

Extension of Public Education Clarence Arthur Perry,1915 *The Publishers Weekly* ,1911 The Handbook of the
International Law of Military Operations Terry D. Gill,Dieter Fleck,2015-12-10 The second edition of this well received
 handbook provides a comprehensive overview and annotated commentary of those areas of international law most relevant to
 the planning and conduct of military operations It covers a wide scope of military operations ranging from operations
 conducted under UN Security Council mandate to collective self defence and consensual and humanitarian operations and

identifies the relevant legal bases and applicable legal regimes governing the application of force and treatment of persons during such operations. It also devotes attention to the law governing the status of forces, military use of the sea and airspace and questions of international criminal responsibility for breaches of international law. New developments such as cyber warfare and controversial aspects of law in relation to contemporary operations such as targeted killing of specific individuals are discussed and analysed alongside recent developments in more traditional types of operations such as peacekeeping and naval operations. The book is aimed at policy officials, commanders and their military legal advisors who are involved with the planning and conduct of any type of military operation and is intended to complement national and international policy and legal guidelines and assist in identifying and applying the law to ensure legitimacy and contribute to mission accomplishment. It likewise fulfils a need in pertinent international organizations such as the UN, NATO, Regional Organizations and NGOs. It also serves as a comprehensive work of reference to academics and is suitable for courses at military staff colleges, academies and universities which devote attention to one or more aspects of international law treated in the book. This mix of intended users is reflected in the contributors who include senior former policy officials and military legal advisors alongside academics engaged in teaching and research in these areas of international law.
