

MODEL A: Polymerization & Primary (1°) Structure

1. The product of the reaction above is called a "dipeptide".
 - a. Which two functional groups are involved in this reaction? Circle and label these two groups on the reactants. **Carboxyl and amino group**
 - b. Circle and label the new **peptide bond** formed between the two amino acids.
 - c. Does a peptide bond involve the amino acid "**backbone**" or **R-groups**? (Circle one.)
 - d. Draw a square around each **amino acid** in the dipeptide. An amino acid that is part of a polypeptide chain is referred to as a "**residue**."
 - e. Label the "**N-terminus**" and the "**C-terminus**" (also known as the amino- and carboxy-termini) of the dipeptide molecule. ("terminus"="end")
2. The addition (**polymerization**) of amino acid **monomers** is directional, with new amino acids added only onto the C-terminus of the growing polypeptide chain.

- a. Draw a **tripeptide** by redrawing the dipeptide from the image above and include the third amino acid shown to the right.
- b. Circle the **peptide bonds** and label the "**N-terminus**" and the "**C-terminus**" of your tripeptide.
- c. Assign each term: **charged**, **nonpolar**, and **polar** to the correct R-group in your tripeptide.
- d. Two of your R-groups are **hydrophilic** and can form **hydrogen bonds** with water. Draw two H₂O molecules interacting with your tripeptide, using dotted lines to represent the hydrogen bonds. Label the partial charges of the atoms involved in each hydrogen bond you draw.

Proteins: Structure and Function Albert Light, 1974 **Proteins** James J. L'Italien, 2012-12-06 This volume surveys the current status of many of the important methods and approaches which are central to the study of protein structure and function Many of the articles in this volume are written to emphasize the general utility of the method or approach which is at its core and to provide sufficient literature references to enable the reader to adapt the method or approach to other applications It is hoped that this volume will provide a source from which newcomers as well as experienced scientists may become more familiar with recent developments and future trends in some of the important areas of protein research The articles which comprise this book are selected proceedings from the Symposium of American Protein Chemists which was held in San Diego California September 30 to October 3 1985 The goal of the organizers of this first symposium was to provide a forum for discussion and interaction among scientists whose interests span the broad spectrum of protein

structure and function research The concept and timing of the symposium well received as evidenced by the approximately 500 delegates to the was symposium The inaugural meeting was marked by a strong scientific program with over 140 papers presented in either a lecture or poster format
