skills in the elementary grades is often an afterthought if it is a thought at all. Veteran primary teacher and instructional leader Erin Shadowens proposes that students of all ages benefit when teachers expand the definition of what is possible by engaging young learners with real challenges and supportive accessible learning environments. In *Critical Thinking in the Elementary Classroom*, Shadowens explores the concept of critical thinking, clarifies misunderstandings, and delves into relevant research. It introduces the Critical Thinking Framework to help nurture deep thinking in the context of content-focused lessons, presents case studies of the framework in action, shows how to apply the framework at the unit and lesson levels, addressing common instructional pitfalls along the way. It describes how a virtuous cycle of assessment and feedback promotes academic achievement and critical thinking. It illustrates how to foster an intellectual community with young learners. Ultimately, this book guides elementary teachers in supporting students to think deeply about rich content, make insightful connections, and address issues in broader, more meaningful ways both in and outside of school.

The Leverage of National Board Candidacy Jana Hunzicker, 2006-12. *The Leverage of National Board Candidacy* is written for teachers considering the pursuit of National Board certification as well as for those currently engaged in the certification process. Capturing the experiences of Anne, Barbara, and Jamie, three teachers who sought NBPTS certification during the 2004-2005 school year, the book vividly describes their teaching practices, guiding philosophies, and thought processes before exploring each teacher's learning as it occurred during the certification year. Comparing the three teachers' certification experiences to the findings of recently conducted research, the book explores characteristics of readiness for National Board candidacy, common learning outcomes of the NBPTS certification process, and possible explanations for the varying nature and degree of learning that occurred for the three teachers through the experience. The final chapter presents the theory of leverage during National Board candidacy, an interactive dynamic that creates an uncomfortable yet positive pressure that makes the pursuit of National Board certification one of the most powerful professional development experiences currently available to teachers.
